

# Krytheon Launches Cross-Border FX and Payments Platform to Streamline Global Transactions

*Krytheon introduces a more efficient way to move money globally by aligning FX execution and payouts within a single, controlled system.*

NEW YORK , NY, UNITED STATES, April 29, 2026 /EINPresswire.com/ --

Following the appointment of Aylin

Orial as Chief Executive Officer and Chief Innovation Officer, [Krytheon](#) today announced its official launch as a cross-border payments and foreign exchange platform designed to improve how transactions are executed across jurisdictions.

Krytheon Inc.

“

Krytheon is not another fintech product, it is the governed execution layer for global value, where every dollar, decision, and transaction is matched, verified, and continuously optimized in motion”

*Aylin Orial*

As global commerce and cross-border activity accelerate, financial infrastructure has struggled to keep pace. Transactions often move through multiple intermediaries, creating delays, added cost, and limited visibility. Krytheon addresses this gap with a more direct and coordinated execution model.

The platform consolidates FX execution, compliance, and settlement into a single operational flow, allowing transactions to be routed and completed with greater speed and precision across existing banking and payment networks.

Krytheon’s initial focus is on high-friction FX payment corridors, where traditional processes require multiple handoffs to complete a single transaction. By reducing these dependencies, the platform improves efficiency while maintaining transparency and control.

Unlike traditional remittance providers and payment platforms that depend on layered routing structures, Krytheon coordinates execution within a unified system, reducing operational complexity without replacing the underlying financial institutions.

“Krytheon is not another fintech product, it is the governed execution layer for global value, where every dollar, decision, and transaction is matched, verified, and continuously optimized in motion,” said Aylin Oriol, Chief Executive Officer and Chief Innovation Officer of Krytheon.

The platform is rail-agnostic, enabling transactions to move across bank transfers, card networks, and global payout providers based on destination and performance requirements.

Krytheon operates as a coordination and execution layer that integrates with regulated financial institutions, maintaining a clear separation between its technology platform and licensed banking, custody, and payment functions.

“Krytheon is being developed with a disciplined focus on execution and regulatory alignment,” said Dr. Umer Sayeed-Shah, Chairman of Krytheon. “This launch establishes a foundation for scalable, compliant cross-border payments and FX execution.”

The system is designed to expand across additional corridors and use cases while maintaining full auditability and alignment with global regulatory standards.

#### About Krytheon

Krytheon is a cross-border payments and foreign exchange platform focused on improving how transactions move across borders. By coordinating execution across FX, routing, and settlement, Krytheon delivers faster, more transparent, and more reliable global transactions.
