

Appy Pie Empowers Businesses to Convert Websites into Mobile Apps — No Coding Required

Appy Pie enables businesses to transform websites into native Android and iOS apps in minutes

NOIDA, UTTAR PRADESH, INDIA, April 29, 2026 /EINPresswire.com/ -- Appy Pie, a leading AI-

powered no-code development platform trusted by over 10 million businesses worldwide, continues to transform how businesses approach mobile strategy with its Website-to-App Converter, enabling companies of any size to [convert website to mobile app](#) — without writing a single line of code.

Our website to app converter changes that equation entirely. Whether you run a store, a content platform, or a booking service, you can now meet your customers where they are — on their home screens.”

Abhinav Girdhar, Founder & CEO Appy Pie

With mobile app usage continuing to outpace mobile web browsing, businesses without a dedicated app risk losing engagement, discoverability, and revenue. Traditionally, building a native mobile app from scratch takes 3 to 6 months and requires significant development resources. Appy Pie's website to app converter eliminates these barriers, allowing business owners to turn any website into a polished Android and iOS app in minutes — not months.

The Website-to-App Converter includes a robust suite of enhanced features designed for real-world business needs:

- Live Sync — Website updates automatically reflect in the app in real time, eliminating the need for manual maintenance or separate content management.
- Offline Access — Users can access essential content even without internet connectivity, ensuring uninterrupted engagement in low-bandwidth environments.
- Firebase-Powered Push Notifications — Reach users directly on their devices with targeted, segmented push notifications that drive engagement and retention.

- Native Device Integration — Leverage camera, microphone, GPS, and other device capabilities to deliver a truly native experience that web browsers cannot match.
- Built-In Analytics — Track downloads, session duration, user engagement, and retention metrics to make data-driven decisions about your mobile strategy.
- Monetization Tools — Integrate AdMob advertising and in-app purchases to generate revenue directly from your mobile app.
- User Authentication — Provide a seamless, consistent login experience across web and app platforms.
- 85+ Customizable Features — From splash screens and custom navigation to resource caching and branded design, tailor every aspect of the app experience.

Businesses using Appy Pie's [app builder](#) have seen measurable impact, with case studies showing a 41% increase in repeat mobile users and 36% higher engagement compared to mobile web alone. The platform serves a wide range of industries including e-commerce, content platforms, membership and subscription services, booking and appointment businesses, and more.

About Appy Pie

Appy Pie is a global no-code AI platform headquartered in Noida, India, with offices in the United States and United Kingdom.
