

# Flower Turbines Incorporates in UK

*Flower Turbines Incorporates in UK*

LAWRENCE, NY, UNITED STATES, April 30, 2026 /EINPresswire.com/ -- [Flower Turbines](#) Limited is now incorporated in the UK to bring the companies innovations in small vertical axis wind energy to the UK.

One of its first target markets is making projects for entities with large amounts of real estate and a serious need for electricity bill reduction such as factories, government buildings, data centers, airports, and apartment complexes, where the company's innovative aerodynamics can result in serious savings, as the turbines can be clustered so that each one added at close range to a group makes the whole group perform better. For numbers on how this compares with and can be synergistic with solar photovoltaic in the UK, visit the page <https://www.flowerturbines.com/uk>

Flower Turbines will be rolling out more residential options soon. Flower Turbines currently sells e-bike and device outdoor charging stations.

Presentations for different business groups are on one of the Resources pages: <https://www.flowerturbines.com/specs-education>

It is also applying for SEIS status and is looking for a few early investors conditional on that

Bouquet of Wind Tulip Turbines

## The Cluster Effect

Average Watts Per Small Wind Turbine at 10m/s

This shows how each turbine produces more energy as another turbine is clustered. 5 Flower Turbines together produce 228% more power than 5 separate turbines.

status.

The turbines come in sizes for rooftop and ground installation.

The CEO, Dr. Farb, said, "Solar power has grown quickly in the UK because it has been available, but a hybrid approach would likely be ideal. Small wind hasn't caught on to this point, but our technology can change that. It's a windy country with limited space, and we have the answer."

Flower Turbines makes small wind turbines that are special in many ways. They are elegant, noiseless, efficient, bird-friendly, endure high speeds, and start at low speeds. The invention that makes them the most cost and space-efficient choice for a small vertical axis wind turbine is their patented "cluster" or "bouquet" effect; when placed close together properly, each one added to a group makes the whole group perform better. As few as 4 turbines together produce the electricity of 8 separate turbines.

Potential customers can contact Flower Turbines at [support.us@flowerturbines.com](mailto:support.us@flowerturbines.com) except for the EU at [support.eu@flowerturbines.com](mailto:support.eu@flowerturbines.com) and the UK at [support.uk@flowerturbines.com](mailto:support.uk@flowerturbines.com).

Flower Turbines, Inc. has external validation as a top company:

- Chosen for the UK Government's Global Entrepreneurship Program
- Awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the Solar Impulse website: <https://solarimpulse.com/efficient-solutions/wind-tulips#>
- A winner of Pepperdine Graziado Business School's annual Most Fundable Companies in

UK Government Recognition of Flower Turbines

Flower Turbines at Rotterdam Roof Days

America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined.

- Winner of the Dutch government sustainability award for two separate years.
- A winner of the 2023 Yes San Francisco clean technology competition for top technologies to implement in San Francisco in association with the World Economic Forum
- The CEO was chosen as a 2021 innovator of the year by the US Department of Energy Impel+ program.
- Chosen by US Department of Housing and Urban Development for its Innovation Showcase on the Washington Mall
- Winner of many other awards
