

Charging Network Roaming Hub Market 2026-2030: Unveiling Growth Developments with the Latest Updates

The Business Research Company's Charging Network Roaming Hub Global Market Report 2026 - Market Size, Trends, And Global Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, May 1, 2026

/EINPresswire.com/ -- [Charging Network Roaming Hub market](#) to surpass \$2 billion in 2030. In comparison, the Automotive Logistics market, which is considered as its parent market, is expected to be approximately \$458 billion by 2030, with Charging Network Roaming Hub to represent around 0.4% of the parent market. Within the broader Transport Services industry, which is expected to be \$12,774 billion by 2030, the Charging Network Roaming Hub market is estimated to account for nearly 0.02% of the total market value.

The Business Research Company

Which Will Be The Biggest Region In [The Charging Network Roaming Hub Market In 2030?](#)

Asia-Pacific will be the largest region in the charging network roaming hub market in 2030, valued at \$0.9 billion. The market is expected to grow from \$0.3 billion in 2025 at a compound annual growth rate (CAGR) of 23%. The exponential growth can be attributed to the rapid expansion of electric vehicle adoption across key countries such as China, Japan, and South Korea, increasing

deployment of public and private charging infrastructure, rising demand for seamless cross-network charging interoperability, strong presence of leading e-mobility service providers and charging platform developers, and supportive government policies promoting regional EV ecosystem integration and digital charging solutions.

Which Will Be The Largest Country In The Global Charging Network Roaming Hub Market In 2030?

The USA will be the largest country in the charging network roaming hub market in 2030, valued at \$0.5 billion. The market is expected to grow from \$0.2 billion in 2025 at a compound annual growth rate (CAGR) of 23%. The exponential growth can be attributed to the rapid expansion of nationwide EV charging networks, increasing partnerships between charging point operators and roaming platform providers, growing demand for unified payment and authentication systems, rising adoption of open charging protocols such as OCPI, and strong investments in smart charging infrastructure and digital energy management platforms.

What Will Be The Largest Segment In The Charging Network Roaming Hub Market In 2030?

The charging network roaming hub market is segmented by component into platform and services. The platform market will be the largest segment of the charging network roaming hub market segmented by component, accounting for 65% or \$1 billion of the total in 2030. The platform market will be supported by the increasing need for centralized roaming management systems, growing demand for real-time data exchange and interoperability between multiple charging networks, rising adoption of cloud-based EV charging management platforms, and continuous advancements in software solutions enabling seamless authentication, billing, and energy optimization across diverse charging ecosystems.

The charging network roaming hub market is segmented by connectivity into open protocol and proprietary protocol.

The charging network roaming hub market is segmented by application into public charging, private charging, and fleet charging.

The charging network roaming hub market is segmented by end-user into electric vehicle (EV) operators, charging point operators, e-mobility service providers, and utilities.

What Is The Expected CAGR For The Charging Network Roaming Hub Market Leading Up To 2030?

The expected CAGR for the charging network roaming hub market leading up to 2030 is 22%.

What Will Be The Growth Driving Factors In The Global Charging Network Roaming Hub Market In The Forecast Period?

The rapid [growth of the global charging network roaming hub market](#) leading up to 2030 will be driven by the following key factors that are expected to reshape EV charging interoperability frameworks, digital platform integration strategies, cross-network collaboration models, and user-centric charging experiences across the global e-mobility ecosystem.

Rapid Expansion Of EV Charging Infrastructure And Networks – The rapid expansion of EV charging infrastructure and networks is expected to become a key growth driver for the charging network roaming hub market by 2030. Governments, utilities, and private players are aggressively investing in the deployment of public, private, and fleet-based charging stations to support the accelerating adoption of electric vehicles. This widespread infrastructure growth is leading to the emergence of fragmented charging networks, thereby increasing the need for centralized roaming hubs that enable connectivity across multiple operators. Roaming platforms facilitate seamless data exchange, authentication, and billing between networks, ensuring efficient utilization of charging assets. As a result, the rapid expansion of EV charging infrastructure and networks is anticipated to contribute approximately 3.0% annual growth to the market.

Increasing Demand For Seamless Cross-Network Charging Experience – The increasing demand for seamless cross-network charging experience is expected to emerge as a major factor driving the expansion of the charging network roaming hub market by 2030. EV users are seeking convenient and uninterrupted access to charging services without the need for multiple subscriptions, applications, or payment systems. Roaming hubs address this challenge by enabling unified access, real-time station availability, and integrated payment solutions across diverse charging networks. This enhanced user experience is becoming critical for accelerating EV adoption and improving customer satisfaction. Consequently, the increasing demand for seamless cross-network charging experience is projected to contribute around 2.8% annual growth to the market.

Rising Focus On Interoperability And Standardization In EV Ecosystems – The rising focus on interoperability and standardization in EV ecosystems is expected to act as a key growth catalyst for the charging network roaming hub market by 2030. Industry stakeholders are increasingly adopting open protocols and standardized communication frameworks such as OCPI and OCPP to ensure compatibility between different charging networks, platforms, and service providers.

This shift is enabling efficient integration of roaming platforms, reducing system complexity, and fostering collaboration across the EV value chain. Standardization also supports scalability and future-proofing of charging infrastructure as the market expands. Therefore, the rising focus on interoperability and standardization in EV ecosystems is projected to contribute approximately 2.5% annual growth to the market.

What Are The Key Growth Opportunities In The Charging Network Roaming Hub Market In 2030?

The most significant growth opportunities are anticipated in the platform market and the services market. Collectively, these segments are projected to contribute over \$1.4 billion in market value by 2030, driven by the increasing need for centralized EV charging roaming management systems, rising demand for real-time data exchange and seamless interoperability across multiple charging networks, growing adoption of subscription-based and transaction-based service models, and continuous advancements in cloud-based platforms and API-driven integration frameworks. This momentum reflects the e-mobility industry's focus on enhancing user convenience, enabling unified access and billing systems, and supporting scalable and interoperable charging ecosystems, accelerating growth across the global charging network roaming hub market.

The platform market is projected to grow by \$0.9 billion, while the services market is projected to grow by \$0.5 billion over the next five years from 2025 to 2030.

Learn More About The Business Research Company

The Business Research Company (www.thebusinessresearchcompany.com) is a leading market intelligence firm renowned for its expertise in company, market, and consumer research. We have published over 17,500 reports across 27 industries and 60+ geographies. Our research is powered by 1,500,000 datasets, extensive secondary research, and exclusive insights from interviews with industry leaders.

We provide continuous and custom research services, offering a range of specialized packages tailored to your needs, including Market Entry Research Package, Competitor Tracking Package, Supplier & Distributor Package and much more.
