

Bits In Glass Sponsors Boomi World 2026, Returns to the Stage One Year After Hackathon Recognition

Boomi AI Agent Hackathon co-winner to lead a featured session on guardrails for agentic AI workflows.

EDMONTON, AB, CANADA, May 6, 2026 /EINPresswire.com/ -- Bits In Glass (BIG), a global

“

We've learned the real risk with agentic AI is architectural, not algorithmic. It comes down to where you place the human gates...and that's the conversation we're bringing to Boomi World 2026.”

Aaron Wentzell, VP Technology & Innovation

boutique consulting firm specializing in intelligent automation, today announced its sponsorship of Boomi World 2026 and a featured speaking session. The announcement comes one year after BIG was named one of the winners of Boomi's inaugural AI Agent Hackathon for its production-ready Invoice Assistant.

Aaron Wentzell, Vice President of Technology & Innovation at Bits In Glass, will lead “AI in Integration: Guardrails for Agentic Workflows with Boomi Agent Step” on Wednesday, May 13, at 3:30 PM CT in Grand Hall I. The session distills what BIG has learned in the year since the hackathon — taking agentic AI from prototype to production with the

governance, observability, and reliability enterprises require.

“Being recognized as one of the winners of the hackathon proved what was possible with Boomi Agentstudio. A year in, we've learned the real risk with agentic AI is architectural, not algorithmic. It comes down to where you place the human gates, not how smart the model is, and that's the conversation we're bringing to Boomi World 2026,” said Aaron Wentzell.
