

Work Stack Provides Free Block and Stack Planning Tool for Office Restacks

Work Future has launched Work Stack, a purpose built block & stack tool that gives organisations the ability to visualise their building and teams for free.

PERTH, WESTERN AUSTRALIA,
AUSTRALIA, May 4, 2026

/EINPresswire.com/ -- [Work Stack](#) was born from a real project. Founder Peter Stansfield was helping a client plan an office restack involving over 30 teams across 9 floors. The planning was genuinely complex, but the team had no specialist tools to work with. They were cobbling it together with PowerPoint slides and spreadsheets, and it wasn't efficient or productive.

"They didn't need a huge software implementation," says Stansfield.

"They just needed a practical way to

build the stack, test their options, and communicate the plan. But the enterprise tools that could do this were completely out of reach for their budget. And they're not unusual. Plenty of organisations are big enough for their workplace planning to be complex, but not big enough to justify enterprise software costs. So I built one."

Work Stack was originally designed for Space Planners, Workplace Strategists, and Property Portfolio Managers, but Stansfield says the audience has turned out to be much broader than expected.

"You don't need to be a workplace professional to use it. If you understand your own organisation and you can get your hands on an org chart, you can build your block and stack for free. Enter your teams, enter your floors, and Work Stack generates a visual block and stack plan of your building. Save it, load it later, share it with your leadership team. All free."

The graphic features a dark purple background with a 3D isometric view of a multi-story office building on the right. The building's floors are represented by colored grids (blue, pink, and purple) with small icons of people and desks. On the left, the text 'WORK STACK' is written in large, bold, pink and blue letters, with 'IS LIVE' below it in a similar style. Above this, in smaller white text, is 'WORK STACK BLOCK AND STACK PLANNING TOOL'. Below the main title, it says 'Free Block & Stack Planning Tool'. Three circular icons with corresponding text are listed: a group of people icon for 'Visualise teams across floors', a stack of blocks icon for 'Plan office restacks', and a bar chart icon for 'Model workplace scenarios'. At the bottom, a white rounded rectangle contains a globe icon and the text 'Learn more: workfuture.com.au/workstack'. Below the graphic, the text 'Work Stack is Live' is centered.

Work Stack is Live

The [free version](#) covers creating, saving, and loading stacks. [Paid plans](#) add manual editing tools at a single flat fee per user, and advanced features such as automated stacking and relocation planning at another flat fee. There is no pricing that scales with headcount, no lock-in contracts, and no lengthy onboarding process.

"I don't know of anyone else out there giving organisations the ability to visualise their building and team allocations for free. That's a game changer for teams planning office moves and restacks who would otherwise be stuck in PowerPoint and spreadsheets."

Work Stack closes the gap between expensive enterprise platforms and doing everything manually. It brings serious block and stack planning capability within reach of organisations without enterprise-level software budgets. Once downloaded, setup takes seconds, not months.

“

If you know your organisation, you can visualise it for free with Work Stack. You don't need to be a workplace professional, you just need an org chart."

Peter Stansfield

"I set out to build something for companies that sit in the gap between 'too complex for spreadsheets' and 'can't afford enterprise software.' That's exactly what Work Stack is. If you know your organisation, you can visualise it for free with Work Stack."
