

TuxCare Announces Endless Lifecycle Support for Angular 19

PALO ALTO, CA, UNITED STATES, May 5, 2026 /EINPresswire.com/ -- [TuxCare](#), a global innovator in securing open source, today announced the availability of [Endless Lifecycle Support \(ELS\) for Angular 19](#), helping organizations maintain secure and stable environments long after the framework reaches end of life on May 19, 2026.

Angular 19 remains one of the world's most widely adopted frontend frameworks. For organizations with production applications built on Angular 19, the end of official support can force rapid upgrades, often resulting in disruption, unexpected costs, and strained development resources.

Built around the customer's timeline, TuxCare's ELS for Angular 19 removes the need for rushed migrations by delivering ongoing, SLA-backed security patches for Angular 19 and its full dependency tree for as long as needed. IT and development teams are then provided the flexibility needed to plan, test, and execute upgrades on a schedule aligned with business priorities rather than vendor deadlines.

"Angular applications support critical business operations every day," said Michael Canavan, Chief Revenue Officer at TuxCare. "That makes rushed upgrades a serious business concern. With Endless Lifecycle Support for Angular 19, organizations can keep critical applications protected and compliant while avoiding the cost and interference associated with forced migrations."
