## Pet Grooming Services Market Size and Projected Expansion

The pet grooming services market has shown robust growth over the past few years. It is set to expand from \$8.44 billion in 2025 to \$9.1 billion in 2026, reflecting a compound annual growth rate (CAGR) of 7.8%. This growth during the historical period is linked to factors such as an increase in pet ownership, higher disposable incomes,

rising awareness about pet hygiene, the growth of urban pet households, and the emergence of specialized grooming salons. Looking ahead, the market is forecasted to reach \$12.31 billion by 2030, maintaining the same CAGR of 7.8%. This future growth will be propelled by the rise of mobile grooming services, increased adoption of eco-friendly grooming products, the popularity of premium and specialized grooming packages, integration of veterinary check-ups within grooming sessions, and greater use of online booking platforms.

The Definition and Role of Pet Grooming Services

Pet grooming services refer to businesses that provide grooming and washing for animals, often accompanied by sales of related products. Beyond beautification, these services play an important role in spotting early symptoms of illness or injuries in pets, helping to prevent more serious health issues. Regular grooming contributes not only to pets' cleanliness and appearance but also supports their overall wellness and comfort.

#### Main Factors Boosting Demand in the Global Pet Grooming Services Market

A key driver behind the growth of the pet grooming market is the rising expenditure on pets. This expenditure encompasses spending on food, healthcare, grooming, accessories, and other essentials to support pets' health and well-being. The increase is largely due to the humanization of pets, where owners invest more in premium nutrition, healthcare, and comfort products to improve their pets' lifestyles. Professional grooming services encourage pet owners to consistently spend on maintaining their pets' hygiene and appearance, thus contributing to increased overall spending. For example, in March 2024, the American Pet Products Association projected that total pet industry spending in the United States would reach \$150.6 billion in 2024, rising from \$147.0 billion in 2023 and \$136.8 billion in 2022. This increasing expenditure directly supports the growing pet grooming services market.
