

EshipJet Introduces Shipping Solution to Enhance Logistics Performance Without Replacing ERP Systems

Transform your logistics performance without any replacement - Integrate EshipJet with any ERP Systems like SAP, Acumatica, to drive faster, smarter shipping.

HOUSTON, TX, UNITED STATES, May 5, 2026 /EINPresswire.com/ -- As supply chains continue to evolve at a rapid pace, businesses are under constant pressure to improve shipping efficiency, reduce costs, and deliver faster—without disrupting their existing operations. Addressing this critical need, EshipJet introduces a smarter approach: upgrade logistics performance without replacing your entire system.

Many organizations continue to rely on legacy ERP platforms such as SAP, Oracle, Acumatica, and Microsoft Dynamics 365—systems that are deeply embedded in their operations. While these platforms are critical for core business functions, they often lack the agility required to meet modern shipping demands such as real-time rate shopping, automated label generation, multi-carrier integration, and end-to-end visibility.

EshipJet.ai bridges this gap by seamlessly integrating with existing ERP systems, enabling businesses to modernize their logistics capabilities without costly and time-consuming system overhauls. This approach empowers companies to enhance shipping workflows, improve delivery accuracy, and gain real-time insights—all while leveraging their current infrastructure.

“With increasing pressure on supply chains, companies don’t need to start from scratch to stay competitive,” said Lynda Ling, Account Executive at EshipJet. “Our solution is designed to extend

ESHIPJET.AI

Seamlessly Integrate.
Ship Smarter.
Grow Faster.

ERP SYSTEMS WE INTEGRATE WITH

- SAP
- ORACLE NETSUITE
- Microsoft Dynamics 365
- infor
- Acumatica The Cloud ERP

EshipJet integrates with leading ERP systems to streamline shipping, automate workflows, and drive end-to-end logistics efficiency.

- Seamless Integration
- Automated Shipping Workflows
- Real-time Rates & Cost Savings
- End-to-End Visibility
- Scalable for Your Business

Transform the Way You Ship—Effortlessly.

- 100+ Carrier Connections
- 200+ Countries Covered
- 99.9% System Uptime
- Secure. Reliable. Enterprise Ready.

Multi-Carrier Shipping Software

the power of existing systems, helping businesses achieve faster, smarter, and more cost-effective shipping operations.”

EshipJet’s multi-carrier shipping platform offers:

- Intelligent rate shopping across global carriers
- Automated shipping and label generation
- Real-time tracking and visibility
- Address validation to reduce delivery failures
- Scalable integration with leading ERP systems

By focusing on enhancement rather than replacement, EshipJet enables organizations using platforms like SAP ERP, Oracle ERP, Acumatica, and Microsoft Dynamics 365 to accelerate digital transformation, reduce operational disruptions, and maximize ROI on their current technology investments.

Streamline your entire logistics process with advanced AI-powered software. Manage multi-carrier shipping for both outbound and inbound operations seamlessly.”
