"The consolidation of our firm in the United States is now a reality, and we are convinced that our growth potential remains significant. We are achieving a meaningful increase in our volumes thanks to a business model that focuses on quality and the satisfaction of its bankers, who are key to building long-term relationships with clients," said Joaquín Francés, CEO of Mora Capital Group.

In 2022, Mora Capital Group's assets under management were below $2.0 billion. The rapid expansion of AUM has been primarily driven by the strong performance of two distinct business areas: Mora Capital Management, which covers advisory activities, and Mora Capital Securities, a broker-dealer specialized in brokerage and execution services, as well as in providing access to markets and financial products

A key pillar of the Group's business
The strong performance of Mora Capital Group in Miami and other international subsidiaries was reflected in the consolidated results of its parent company, which reached a new milestone in 2025, with €20.141 billion in assets under management. With net income of €62.5 million, MoraBanc Group recorded its tenth consecutive year of uninterrupted growth.
