

Swine Feed Minerals Market: Size, Share, Competitive Overview, and Trend Analysis Report

The Business Research Company's Swine Feed Minerals Global Market Report 2026 – Market Size, Trends, And Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, May 5, 2026

/EINPresswire.com/ -- The [swine feed minerals market](#) has experienced

significant growth recently, driven by evolving consumer preferences and advancements in animal nutrition. As demand for pork rises globally, the market is set to continue expanding steadily over the coming years. This overview explores the market's size, key growth factors, dominant regions, and ongoing trends shaping its development.

Market Size and Growth Projections for the Swine Feed Minerals Market

The swine feed minerals market has witnessed robust expansion in recent years. It is projected to increase from \$163.73 billion in 2025 to \$180.07 billion in 2026, reflecting a compound annual growth rate (CAGR) of 10.0%. This upward trend during the historical period is largely driven by growing pork consumption, the traditional reliance on cereals and oilseed meals in feed, enhanced awareness of swine nutrition, the adoption of vitamins and antioxidants, and the expanding swine population in the Asia-Pacific region.

balanced swine feed formulations, growing efforts to reduce antibiotic use, and adoption of high-quality feed ingredients to promote optimal growth.

Understanding Swine Feed Minerals and Their Role

Swine feed minerals consist of feed formulations that provide pigs with essential energy, proteins, minerals, and vitamins necessary for healthy growth and performance. Protein sources within these feeds are crucial for supporting pig development and improving productivity. These carefully balanced mineral supplements play a vital role in ensuring the nutritional needs of pigs are met efficiently.

Main Factors Propelling the Swine Feed Minerals Market

A significant catalyst for market growth is the rising global consumption of meat, particularly pork. Meat, derived from livestock and poultry, is a critical source of dietary protein. As consumer demand for protein-rich and nutrient-dense foods grows—driven by health-conscious lifestyles—the need for improved swine nutrition intensifies. By enhancing pig health and growth rates, swine feed minerals contribute to a reliable and increased supply of pork products for consumers worldwide. For example, the Food and Agriculture Organization (FAO) reported that global meat production climbed to 371 million tonnes in 2023 from 365 million tonnes the previous year, highlighting ongoing growth in meat demand which supports the expansion of the swine feed minerals market.

Regions Leading the Swine Feed Minerals Market

In 2025, Asia-Pacific emerged as the largest region within the swine feed minerals market. The market analysis encompasses multiple geographic areas, including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa. This broad regional coverage provides a comprehensive understanding of the market's global dynamics and growth potential.
