

High Performance Systems Announces Advanced Seamless Flooring for Commercial Restaurant Kitchens In the Tri-State Area

High Performance Systems Announces Advanced Seamless Flooring

MIDDLESEX, NJ, UNITED STATES, May 6, 2026 /EINPresswire.com/ -- [High Performance Systems](#), a leader in certified epoxy flooring since 1988, is proud to highlight its specialized [commercial restaurant kitchen flooring](#) systems. Designed for high-volume food service, these solutions deliver unmatched durability, safety, and hygiene for facilities in New Jersey, New York, and Pennsylvania.

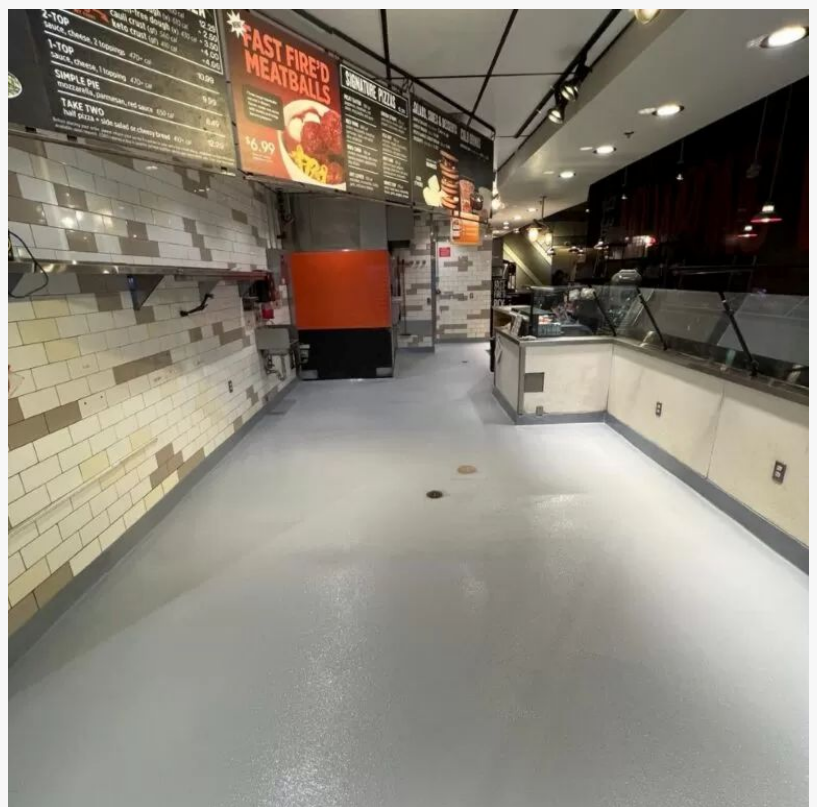

In an industry where downtime isn't an option, High Performance Systems offers rapid installation during off-hours or in phases, so your restaurant operations stay on track. The systems are specifically designed to address the most common failures in kitchen environments, including thermal shock, chemical erosion, and slip-and-fall hazards.

*Key Features of the [Restaurant Kitchen System](#):

Thermal Shock Resistance: Utilizing advanced chemistry with expansion coefficients matching the concrete substrate, these floors withstand constant hot and cold water washdowns without peeling or loosening.

-Slip-Resistant Fryer Zones: Specialized high-traction textures remain effective even under constant exposure to grease and oil, ensuring an OSHA-compliant environment for staff.

-Superior Hygiene: The seamless surface features integrated radius coving, creating a smooth

Restaurant Kitchen Flooring

transition from floor to wall that eliminates bacteria-harboring corners and simplifies cleaning.

-Chemical Durability: Engineered to resist harsh industrial cleansers, the flooring retains its color and structural integrity over years of aggressive maintenance.

"A seamless kitchen floor is more than just a surface; it's a commitment to hygiene and professional standards that inspectors and staff recognize immediately," said a spokesperson for High Performance Systems. "Our goal is to provide a long-term, state-of-the-art solution that lets restaurant owners focus on their craft, not their floors."

Epoxy Flooring Tri-State Contractor

High Performance Systems continues to set the standard for industrial and commercial flooring, specializing exclusively in non-residential projects to ensure the highest level of technical expertise for business owners.

“

A seamless kitchen floor is more than just a surface; it's a commitment to hygiene and professional standards that inspectors and staff recognize immediately.”
