

Integrity Garage Doors & Gates Launches Proprietary AI Door Visualizer

In-house AI tool from Bay Area garage door company lets homeowners preview new doors on photos of their actual home — free, no signup, no email capture

HAYWARD, CA, UNITED STATES, May 6, 2026 /EINPresswire.com/ -- [Integrity Garage Doors & Gates](https://www.integritygaragedoors.com/), a licensed Bay Area garage door and gate company serving the region since 2009, today announced the launch of its proprietary [AI-powered Visualizer™](https://www.integritygaragedoors.com/visualizer) — an in-house tool that lets homeowners upload a photo of their home and instantly preview new garage doors in dozens of styles, colors, and configurations before making a buying decision.

Integrity Garage Doors & Gates — serving the Bay Area since 2009. CSLB #1025581.

The Visualizer™ is available now at no cost at <https://integritygd.com/visualizer> and requires no account or signup.

Upload a photo of your house, pick a style, see it on YOUR home — not a stock image. That's a level of confidence the industry has never offered before."

*Dean Regev, Owner of
Integrity Garage Doors &
Gates*

"Choosing a garage door is one of the biggest single decisions in a home's curb appeal — but homeowners have always had to imagine it from a tiny swatch on a sales sheet," said Dean Regev, owner of Integrity Garage Doors & Gates. "We built the Visualizer because we wanted to put that decision back in the homeowner's hands. Upload a photo of your house, pick a style, see it on YOUR home — not a stock image. That's a level of confidence the industry has never offered before."

Built In-House on Gemini 2.5 Flash Image

Unlike third-party widgets that show generic door samples on stock houses, Integrity's

Visualizer™ was built in-house by the company's technology team using Google's Gemini 2.5 Flash Image AI model. The tool processes a homeowner's photo on Integrity's own infrastructure — Cloudflare Workers — and returns a photorealistic rendering of the selected door composited onto the actual home in seconds.

Four Styles, Thousands of Combinations

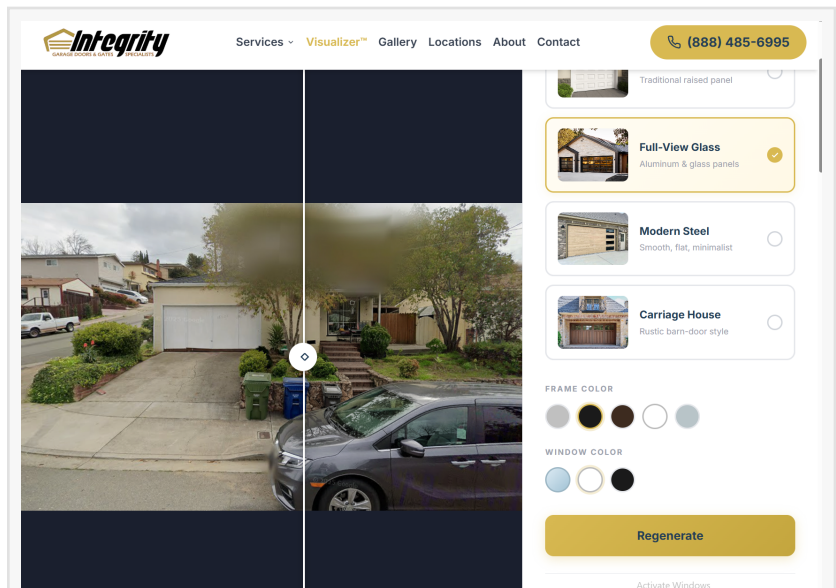

The Visualizer™ currently supports four full garage door categories:

- Classic Steel — traditional raised-panel doors in White, Almond, Sandstone, and Brown, with optional decorative window rows
- Modern Steel — flush-modern doors in Black, Iron Ore, Kona, Coastal Gray, and White, with horizontal or vertical window options
- Full-View Glass & Aluminum — contemporary glass-panel doors in Clear Anodized, Black Anodized, Dark Bronze, White, and Satin Etch
- Carriage House — wood-look stained or painted doors in nine finishes including Walnut, Dark Oak, Espresso, Cedar, and Slate Gray, with four design variations (Cross-Buck, Arched Top, Plank, Chevron) and four hardware options

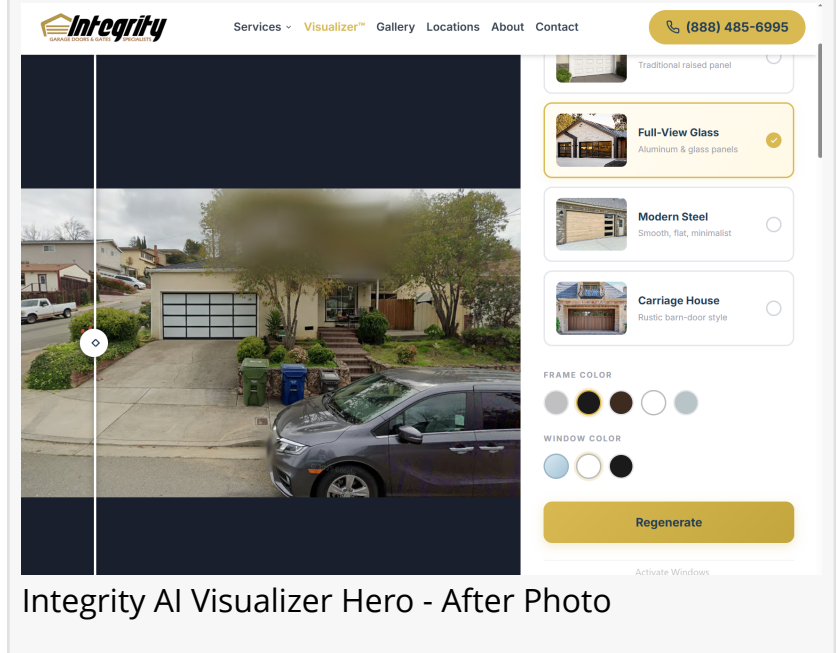

In total, the tool generates more than 2,000 unique style-color-configuration combinations on demand.

Why It Matters for Bay Area Homeowners

The Bay Area's housing stock spans more than a century of architectural styles — from Victorians in San Francisco to mid-century modern in the East Bay to suburban contemporary in the Tri-Valley. Visualizing the right door has historically required either expensive in-home consultations or guesswork from sales brochures. By making AI-driven previews free and instant, Integrity is removing that friction.

Integrity AI Visualizer Hero - Before photo

Integrity AI Visualizer Hero - After Photo

"This isn't a sales gimmick. We don't capture your email, we don't follow up with calls — we built this because we kept hearing from customers who said 'I just wish I could see what it looks like first,'" Regev added. "Now they can."
