

Summit Responsible Solutions® Earns OMRI Listing for Mosquito Bits® and Bti Granules

Makers of Mosquito Bits® and Mosquito Dunks® have just received an OMRI listing for Mosquito Bits® and Summit® Bti Granules.

BALTIMORE, MD, UNITED STATES, May 7, 2026 /EINPresswire.com/ -- Summit Responsible Solutions®, makers of [Mosquito Bits®](#), Mosquito Dunks®, and a full line of insect control products, has just received an [OMRI](#) listing for Mosquito Bits® and [Summit® Bti Granules](#). The designation confirms both products meet USDA National Organic Program (NOP) standards, independently verified by the Organic Materials Review Institute (OMRI).

OMRI listing is a meaningful benchmark. According to OMRI, on average, 10–15% of applications do not complete the review process, and the USDA conducts annual assessments to ensure OMRI's continued conformance with established criteria. Products containing prohibited substances — including glyphosate, synthetic nitrates, arsenic, and rotenone — cannot receive listing.

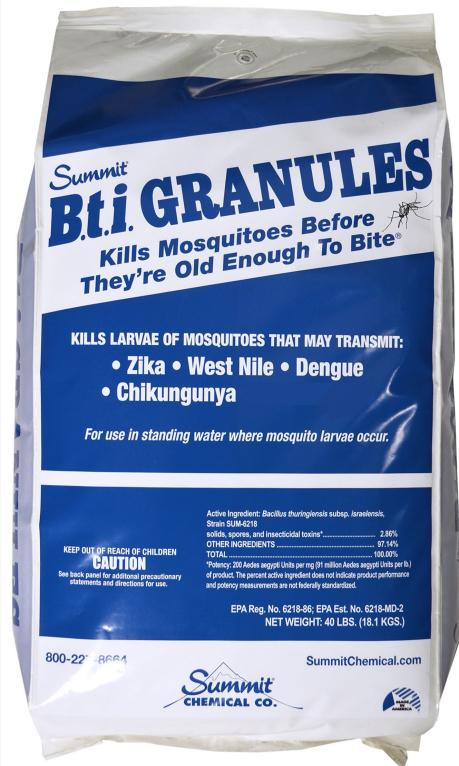

Neither Mosquito Bits® nor Summit® Bti Granules contain any prohibited substance.

What Are These Products?

Both products use *Bacillus thuringiensis* subspecies *israeliensis* (Bti), a naturally occurring soil bacterium that kills mosquito larvae - with no effect on plants, fish, frogs, turtles, beneficial

Summit Responsible Solutions®

Summit® Bti Granules

insects, or people.

Summit® Bti Granules are commercially available for vector control and professional users. When spread over standing water, the granules release Bti at the surface, where it settles and is ingested by mosquito larvae. They deliver a fast kill within 24 hours and can provide control for up to 14 days in water of low to moderate organic content. Often applied by aerial application, vector abatement programs rely on Bti Granules across many mosquito breeding habitats including salt marshes, estuaries, swamps and any large areas of standing water.

Mosquito Bits® are the consumer version of Summit® Bti granules. When sprinkled over standing water, they start killing mosquito larvae within minutes. Bits® are labeled for use in animal watering troughs, birdbaths, ponds, swampy areas – any standing water! Bits® are also effective against fungus gnat larvae in potting soil, making them a dual-purpose solution for homeowners and growers alike.

Application & Coverage

Mosquito Bits®

- 8 oz. — treats up to 2,000 sq. ft.
- 30 oz. — treats up to 7,500 sq. ft.
- 20 lbs. — treats up to 1.8 acres

Summit® Bti Granules

- Available in 40 lb. bags and 1,000 lb. supersacks

About Summit Responsible Solutions®

For nearly 50 years, Summit® has supported public mosquito control programs across the U.S. Mosquito Dunks® and Mosquito Bits® were developed for vector control professionals, then brought to retail by Summit® President Jonathan Cohen — making larval mosquito control accessible to everyone. Summit remains committed to partnering with vector control experts to protect communities and public health, one drop at a time.
