

TuxCare's Senior Developer Advocate To Present at Techorama 2026

PALO ALTO, CA, UNITED STATES, May 8, 2026 /EINPresswire.com/ -- [TuxCare](#), a global innovator in securing open source, today announced that Chris DeMars, Senior Developer Advocate, is scheduled to speak at [Techorama](#), Belgium's leading conference for IT and Microsoft professionals, taking place May 11-13 at the Kinopolis Antwerp in Antwerp, Belgium.

On Tuesday, May 12, from 12:30–12:50 p.m. in Room 8, DeMars is set to present a talk titled, “The node_modules Iceberg: Mysteries Below the Waterline.” The session will explore the overlooked layers of transitive dependencies hidden within node_modules – components that developers depend on daily but seldom have time to inspect. He will also outline how to list transitive dependencies and identify security risks they may pose.

Attendees will also learn how to integrate TuxCare's Extended Lifecycle Support (ELS) to help mitigate associated risks by ensuring vulnerable or end-of-life open-source components receive much-needed, ongoing security updates.

As TuxCare's Senior Developer Advocate, DeMars focuses on secure JavaScript development and software supply chain education. With more than 20 years of experience in web development and developer relations, DeMars is a recognized Progress Champion and former Google Developer Expert and Microsoft MVP – best known for his work in web accessibility, secure frontend practices, and community building. Based in Detroit, he brings both technical expertise and a passion for inclusive, developer-first communities to every stage he steps on.
