

# GPG's Servo Motor and Motor Driver Innovations at Nuremberg SPS

YUEQING, ZHEJIANG, CHINA, May 10, 2026 /EINPresswire.com/ -- As one of the world's premier exhibitions for industrial automation, Nuremberg SPS (Smart Production Solutions) brings together many of the leading companies and professionals involved in smart manufacturing and advanced motion control. In this intensely competitive venue, New Developments in Servo Motors and Driver Technology from GPG at Nuremberg SPS was a highlight showcasing a unique synergy of precision engineering, high-performance reliability, and decades of experience building products.

Innovation and Real-World Solutions Visitors to SPS represent a wide range of industries, but they are all looking for something—solutions that create efficiencies, precision, and system

integration. GPG entered this exhibition with that mindset, converting its booth into an extension of the technical dialogue surrounding the event.

Through technical conversations, engineers were able to intimately connect with system integrators (SIs), OEMs, and automation specialists through real issues such as motion accuracy, control stability, and system compatibility. By directing discussions towards applications rather than products, GPG successfully transitioned the interest of many visitors to technical exchanges of meaningful information.

## [Strong Technical Foundation and a Reliable Manufacturer: GPG](#)

GPG is part of Taibang Motor Industry Group Co. Ltd., an industry-leading provider of gear motors and motion control solutions since 1990. For over three decades, Taibang has developed leading-edge capabilities along the entire value chain including R&D, manufacturing, and quality

GE090 series Round flange 90mm Planetary Gearbox For Servo Motor

assurance.

With state-of-the-art manufacturing operations supported by a dedicated team of engineers focused on quality assurance, GPG is a supplier of high-quality servo motors and drives as well as providing detailed technical expertise. Customers can combine these features to improve their systems while minimizing their development risks.

### Servo Motor and Driver Offerings for Modern Automation

During the exhibition, GPG showcased its servo motor and driver offerings with high accuracy and quick response time. Customers of these systems frequently use them in areas such as automation, robotics, packaging, and smart manufacturing systems.

Many visitors were curious about how GPG's servo systems could provide improved accuracy for equipment positioning, dynamic response speed, and stable performance, regardless of load. GPG was able to provide concrete examples to display how its products work in real-world applications, making it easier for customers to see the value of using GPG products.

### Certified Quality for Global Applications

For global buyers, quality and compliance are of major importance, particularly in automation due to the need for dependable systems. GPG stressed that all of their products comply with the major global certification programs, including UL, CE, TUV, ROHS, and REACH.

This certification demonstrates GPG

Low Noise Parallel Helical Shaft Planetary Gearbox For Servo Motor

Round flange right angle planetary gear reducer for servomotor GER series

has put in place stringent quality control and environmental standards to ensure its servo motor and driver solutions are appropriate to be sold and used in global markets and demanding industrial settings.

Exhibition Strategy for Building Trust  
GPG was able to achieve many successes at the SPS show due to an effective, well-defined exhibition strategy. GPG put less emphasis on the amount of products displayed, and more on interacting with visitors, providing necessary technical clarity, and delivering technical information at a deeper level.

Live demonstrations allowed visitors to see the products perform in real time, and engineers were available to provide detailed explanations of how the servo motors and drivers could be well-suited for various applications. This strategy ensured that visitors not only saw the GPG servo motors and drivers, but they also had a complete understanding of the products and how they could be used.

#### Global Partnership Opportunities at SPS

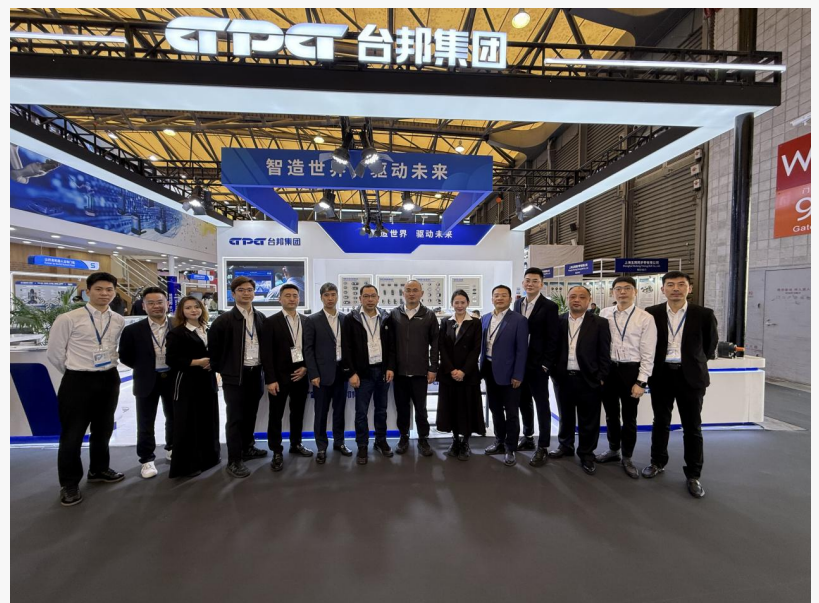

An international audience makes the SPS show an ideal location for developing global partnerships. During the exhibition, GPG was able to meet with distributors, OEM manufacturers, and other automation solution providers from all over Europe and other continents.

These conversations were effective in helping to further develop GPG's global presence and will lead to many new collaborative opportunities in the emerging world of smart manufacturing.

FAQ - Frequently Asked Questions from Show Attendees

one of the world's premier exhibitions for industrial automation

industry-leading provider of gear motors and motion control solutions

What are the best industries to use GPG servo motor solutions?

GPG servo motors and drivers have many applications including automation, robotics, packaging, and precision manufacturing.

Do GPG products meet or exceed global standards?

Yes, all GPG products are compliant with UL, CE, TUV, ROHS, and REACH, and therefore can be sold and used in a global marketplace.

Will GPG provide customized servo solutions for my company?

Yes, GPG will create a customized solution to meet your specific requirements for performance and application.

What are the benefits of GPG's servo systems?

Benefits of GPG's servo systems include high accuracy, consistent performance, fast response time, and high levels of adaptability.

Learn More About GPG

While the GPG customers who visited the Nuremberg SPS show had the opportunity to see the innovative capabilities of GPG's products, the commitment of GPG continues well after the show, through continuous focus on research and development, dependable manufacturing processes, and customer service. GPG continues to provide high-performance servo motor and driver systems.

If you need control solutions that are accurate, efficient, and dependable, GPG is ready to help!
