

Zenlytic Launches Zoë Self-Learning: The AI Data Analyst That Onboards Itself

For the first time, any data leader can deploy enterprise-grade AI analytics in under an hour, ending the months-long setup that has slowed adoption

NEW YORK CITY, NY, UNITED STATES,
May 13, 2026 /EINPresswire.com/ --

[Zenlytic](#), the AI data analyst trusted by

some of the world's largest Enterprise companies, today announced the launch of Zoë Self-Learning, a new capability that lets its AI analytics agent onboard itself onto a company's data in minutes. Alongside the launch, Zenlytic is also opening a [self-serve signup](#) for teams of up to 10 people directly from zenlytic.com.

“

The hardest part of analytics has been the setup. With Zoë Self-Learning, the analytics agent onboards itself, the way your best human employees do. Anyone can set up Zenlytic now.”

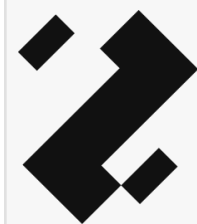

*Ryan Janssen, Co-founder and
CEO of Zenlytic.*

For years, enterprise AI analytics has required 6-month data model buildouts, complex YAML configurations, and tribal knowledge buried in legacy dashboards. Zoë Self-Learning eliminates that setup tax. The agent connects to a company's data warehouse, identifies the relevant tables, builds the semantic layer in the background, and produces trusted answers with citations, all without requiring data engineering work from the customer. Data to decisions in 59 minutes or less.

Zenlytic holds a 4.9 out of 5.0 rating on [Gartner Peer Insights](#), with a 100% likelihood-to-recommend score from

data and analytics leaders.

Zoë Self-Learning is available today for all new and existing Zenlytic customers at zenlytic.com. Self-serve signup is available for teams of up to 10 people.
