

ProCogia Launches ProCogia 2.0, Evolving from Data Consultancy to AI-First Business Solution Consulting Firm

ProCogia 2.0 helps organizations close the gap between AI ambition and production-ready outcomes in complex, regulated environments.

VANCOUVER, BRITISH COLUMBIA,
CANADA, May 14, 2026

/EINPresswire.com/ -- ProCogia (procogia.com), a trusted data and AI partner, today announced the launch of ProCogia 2.0, marking the company's evolution from a data consulting firm into an AI-first business solution consulting partner. Built on a decade-plus of data expertise and experience in complex, regulated environments, ProCogia 2.0 reflects a sharper strategic focus on helping clients move from ambitious AI ideas to governed, production-ready outcomes.

The announcement coincides with a refreshed company website and an updated brand promise — “AI Ambition. Made Possible.” — reflecting a new vision: to shape a bright AI and data-powered future by turning ambitious ideas into impact.

Why Now: AI Has Moved from Experimentation to Expectation

Across industries, AI has shifted from pilot projects to an urgent business expectation, and clients increasingly need governed AI solutions they can deploy with confidence. ProCogia 2.0 is designed to meet that moment. By combining deep technical foundations with practical AI and data implementations, ProCogia helps clients close the execution gap between vision decks and working AI workflows, copilots, and agents that reduce costs and drive growth.

The updated vision aligns the company's strategy, resources, training, and recognition behind a clear 2028 ambition: to become a leading AI-first business solution consulting firm.

Four Client Problems, One Integrated Approach

ProCogia 2.0 organizes its offerings around the four most pressing challenges facing data and AI leaders today:

- Cost and Efficiency Pressures — Reducing run-rate costs by replacing manual workflows and contractor labor with automated, AI-enabled processes.
- AI and Data Readiness and Modernization — Helping leaders identify where AI will have the biggest impact, building a roadmap, aligning data, and combining human experts with AI tools in sustainable operating models.
- Compliant AI Adoption and Scaling — Designing data and AI governance so leaders can safely deploy models, copilots, and automations without unacceptable legal or reputational risk.
- Growth and Capacity Expansion — Using data science, machine learning, and agents to grow revenue through better targeting, personalization, and product or service innovation.

End-to-End Services: Envision, Transform, Optimize

ProCogia 2.0 delivers a complete transformation across three stages: Envision, which clarifies strategy, roadmap, and governance; Transform, which builds and deploys AI and data solutions; and Optimize, which keeps those solutions healthy, compliant, and increasingly valuable over time.

Prebuilt Accelerators Speed Time to Value

Alongside custom data and AI services, ProCogia 2.0 expands its portfolio of customizable prebuilt solutions:

- Dataegis — private, governed AI deployment in a client's own cloud environment.
- Haigent — agentic AI that automates complex HR workflows.
- CallYeah — AI voice agents for existing call center operations.
- Polykode — simplified code conversion across SAS, R, and Python with validated outputs.

What Sets ProCogia Apart

ProCogia's differentiation rests on five interlocking strengths: deep technical capabilities that bring the latest technology to life; practical AI applied to structured data; repeatable design for Responsible AI; expertise in regulated or complex environments; and a trusted, high-touch relationship model. Together, these enable the essential work that makes AI truly function in the environments where it matters most.

Leadership Perspective

"Our clients don't just need AI experiments — they need governed, production-ready solutions

that hold up in complex and regulated environments. That's the gap ProCogia 2.0 is built to close." — Mehar Pratap Singh, Founder & CEO, ProCogia

ProCogia leadership noted that while the external story and strategic focus are evolving, the company's values, commitment to quality delivery, and people-first mentality remain unchanged. Relationships with clients and with each other continue to sit at the center of how the company operates.

Investing in People as Part of the 2.0 Vision

ProCogia is aligning goals, training, and resources to AI-related capabilities and repeatable accelerator frameworks. Employees will see expanded opportunities to learn AI skills, deepen industry expertise, and contribute to reusable accelerators and workflows, with clearer expectations connecting individual goals to company priorities and recognition.

About ProCogia

ProCogia is an AI-first business solution consulting firm that combines deep technical and data expertise with practical AI solutions to help organizations move faster and deliver measurable outcomes. From AI strategy and governance through implementation and ongoing optimization, ProCogia turns breakthroughs into trusted, practical tools that teams can use — especially in complex and regulated environments.
