

# CloudFiles Crosses 1,000 Customers and 230 Five-Star Reviews for Salesforce SharePoint Integration Solution

*Enterprises across 14 industries and 5 continents choose CloudFiles to connect Salesforce and SharePoint and automate document workflows with Flows.*

FREMONT, CA, UNITED STATES, May 19, 2026 /EINPresswire.com/ -- CloudFiles today announced it has surpassed 1,000 enterprise customers and 230 five-star reviews on Salesforce AppExchange (AgentExchnage), cementing its position as the most positively reviewed native [Salesforce SharePoint integration](#) on the platform.

The screenshot displays the CloudFiles interface within a Salesforce environment. At the top, it shows 'CloudFiles' with '230+ 5★ Star Reviews On AppExchange' and the URL 'cloudfiles.io'. The main heading is 'SharePoint files, inside Salesforce.' Below this, a list of features is shown: 'Upload & preview files', 'Auto folder creation via Flow', 'Document engagement analytics', 'Secure external sharing', and 'Bi-directional sync'. On the right, a 'Files' tab is active, showing a list of files for 'Account Name: Universal Technologi'. The files listed are 'UT\_Contract.docx', 'UT\_Proposal.pdf', and 'Presentations'. A context menu is open over the files, with options: 'Open in SharePoint', 'Download', 'Preview', 'Rename', 'Replace', 'Move', 'Share', and 'Delete'. A mouse cursor is pointing at the 'Open in SharePoint' option.

Salesforce SharePoint Integration using CloudFiles | Best Solution | 5 Star on AppExchange | 230+ Reviews

For enterprise teams running Salesforce alongside Microsoft SharePoint, the problem has always been the same - files live in two places, versions fall out of sync, and employees waste hours on manual transfers that should never happen. CloudFiles eliminates this entirely. Teams access, manage, and automate SharePoint files directly from any Salesforce record without ever leaving the platform.

“

Salesforce and SharePoint power the enterprise. CloudFiles makes them work as one - no code, no complexity, no storage limits. 1,000 customers and 230 five-star reviews later, we know we got it right!”  
*Vishesh Singhal, Co-Founder & CEO, CloudFiles*

What drives adoption across 14 industries is the combination of depth and simplicity. CloudFiles supports automated folder hierarchies, bi directional sync, Flow and Apex automation, metadata management, and document engagement analytics - letting teams see exactly who viewed a file, when, and for how long, directly inside Salesforce. No other AppExchange integration in this category offers this level of visibility.

For regulated industries, CloudFiles carries the most comprehensive compliance stack available - SOC 2 Type II, HIPAA, GDPR, ISO 27001, ISO 27017, ISO 27018, and CSA STAR certified. Enterprise teams go live in under 30 minutes with zero custom development.

Rated 5.0 stars with 230+ reviews, CloudFiles is available with a free trial on Salesforce AppExchange: <https://appexchange.salesforce.com/apxListingDetail?listingId=a0N4V00000Gh9uFUAR>
