

# Introducing The AI First Business Phone System

*Enterprise Vibe Telephony Is Here: OPBX*

NEW YORK, NY, UNITED STATES, May 26, 2026 /EINPresswire.com/ --

[Cloudonix](#) today announced the public launch of [OPBX](#), the industry's first AI-native PBX designed specifically for agentic voice applications and modern enterprise telephony.

OPBX, an open source project aimed at disrupting the business phone systems market, is now available. Designed to be an AI First business phone system, OPBX enables multiple AI voice agents connectivity, real time AI load balancing and more - ushering in the age of Vibe Telephony.

Legacy phone systems don't need AI voice agents, voice agents need a new type of phone system."

*Nir Simionovich*

Cloudonix believes that the disruption introduced by agentic voice represents one of the largest transformations in enterprise communications.

"Since the introduction of cloud telephony, no technology has been as disruptive to the industry as agentic voice.

Legacy phone systems don't need AI voice agents, voice agents need a new type of phone system." said Nir Simionovich, CEO of Cloudonix.

As enterprises increasingly adopt AI-powered voice interactions for sales, support, operations, and workflow automation, demand has grown for infrastructure capable of supporting autonomous voice systems at production scale.

"In the past, customers were at the mercy of their vendors. AI changed that! An AI can be your SDR, your IT manager and your PBX programmer. OPBX enables just that - an open source project, built to democratize business phone systems, and commoditize voice agents in the enterprise." said Nir.

"Voice agents are required to become real employees, not just digital assistants." Nir added. "The infrastructure layer must evolve accordingly. OPBX and Cloudonix provide the foundation for that next generation of communications. We invite the global AI community to join this disruption, and cultivate a new breed of AI First telephony solutions."

OPBX is being launched as part of #TechWeek and is available globally beginning today through <https://opbx.cloudonix.cloud> or learn more at one of our AMA sessions:
