

YACSS Expands SEO Content Platform With New Drafting and Publishing Tools

Recent additions include a Listicle Builder, a Local SEO project workflow, and expanded multi-cloud publishing across more than 25 providers.

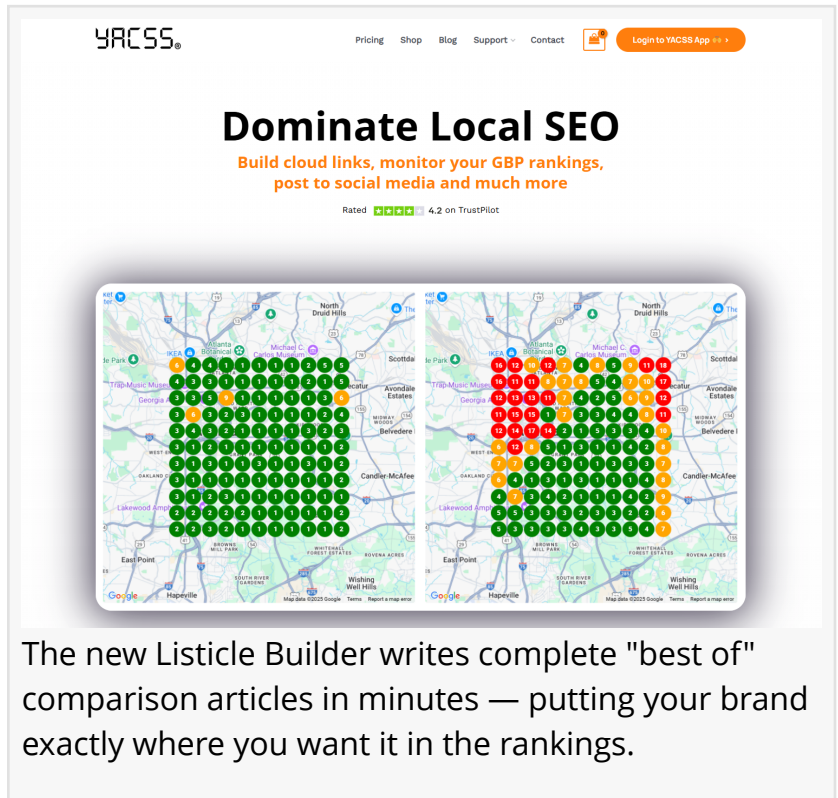

AALBORG, DENMARK, May 20, 2026 /EINPresswire.com/ -- YACSS has rolled out a series of additions to its SEO content platform, extending both the types of content it can draft and the range of destinations it can publish to.

The platform now supports publishing across more than 25 cloud and hosting providers from a single interface, including AWS, Azure, Google Cloud, Oracle, Cloudflare R2, Backblaze, Netlify, Vercel, and GitHub. Recent feature additions include a Local SEO project workflow, the Mass Page Builder, and a new [Listicle Builder](#).

The Listicle Builder drafts complete "best of" comparison articles — intro, per-item entries with ratings, a brand spotlight, conclusion, and FAQs — in a single run. The draft opens in a built-in editor where writers refine each section and align the content with their own testing before publishing.

"We have focused on two things: widening where users can publish, and speeding up the slow, repetitive parts of producing content," said Jesper Nissen of YACSS. "The new tools draft the structure; the writer keeps the judgment."

The additions can now be found in YACSS. Usage guides for each feature are in the support section at YACSS

The screenshot shows the YACSS website interface. At the top, there is a navigation bar with links for Pricing, Shop, Blog, Support, and Contact, along with a 'Login to YACSS App' button. The main heading is 'Dominate Local SEO' in large, bold black text. Below this, a sub-headline reads 'Build cloud links, monitor your GBP rankings, post to social media and much more' in orange. A TrustPilot rating of 4.2 is displayed. The central focus is a map of Atlanta, Georgia, with numerous colored pins (green, yellow, orange, red) indicating local search results or business locations. The map is overlaid on a grid of colored circles.

The new Listicle Builder writes complete "best of" comparison articles in minutes — putting your brand exactly where you want it in the rankings.

About YACSS

YACSS is an SEO platform developed with SEO experts across multiple markets. It automates the creation and deployment of SEO content across more than 25 cloud and hosting providers, supporting agencies, freelancers, and businesses. More information is available at
