[Washington, D.C.](#) news photographer Jake McGuire has just published a new "coffee table" (picture) book featuring his photos of our nation's capital in all four seasons.

Why the weather?

"Everyone is affected by the weather and some industries like agriculture, aviation and traffic are particularly so! And the weather even gets shaded, pun intended," says McGuire, "by folks who call it small talk!"

Book cover features DC's fabled Cherry Blossoms

The book joins McGuire's other DC picture books as welcome gifts for hotels, meeting and conventions. In addition his book is ideal for colleges and universities who have Meteorology or [Atmospheric Science](#) programs, says professor, Scott Sklar, Adjunct Professor & Sustainable Energy Director, Environment & Energy Management Institute (EEMI) at DC's George Washington University.

“

The book will make great required or summer-time reading”

"The book will make great required or summer time reading," says Sklar who feels the students will be enchanted with the beautiful photos and their instructors can explain the science behinds the images.

The book's striking images include one of DC most massive storms, "Snowmageddon" during February of 2010 where two back-to-back storms dumped as much as 60 inches in the area.

Single copies of the book are available on Amazon and for large orders McGuire offers quantity discounts directly from him.
