Increase in need for agrochemicals and rise in demand for high-quality agricultural products drive the growth of the global hydrazine market. However, presence of extreme toxicity in hydrazine that can cause seizures & tumors and various environmental and industry regulations imposed by the National Institute for Occupational Safety and Health restrain the market to some extent. On the other hand, rise in demand for polymer foams from the polymer industry presents new opportunities in the upcoming years.

The report offers detailed segmentation of the global hydrazine market based on product type, application, and region.

Based on application, the blowing agent segment held the largest market share in 2020, holding nearly one-third of the total market share, and is expected to continue its leadership status during the forecast period. The report also analyzes the segments including water treatment, agrochemicals, pharmaceuticals, and others.
