

# TuningBot Expands ECU Coverage Matrix With 837 New and Improved Solutions

*TuningBot's May 2026 update helps tuners and workshops verify supported ECU services before file submission.*

UNITED KINGDOM, May 26, 2026 /EINPresswire.com/ -- TuningBot, a professional [ECU file-service platform](#) for tuners and workshops, has expanded its public [ECU Service Coverage Matrix](#) as part of its [May 2026 update](#).

The update adds 837 new and improved ECU solutions, including more than 100 brand-new solutions and more than 700 improvements to existing coverage. The update focuses on heavy-duty and industrial applications, selected CUMMINS CM2150E, CUMMINS CM2250 and CUMMINS CM2350A ECU families, selected BOSCH MD1 platforms, and improved DTC/SPN support where applicable.

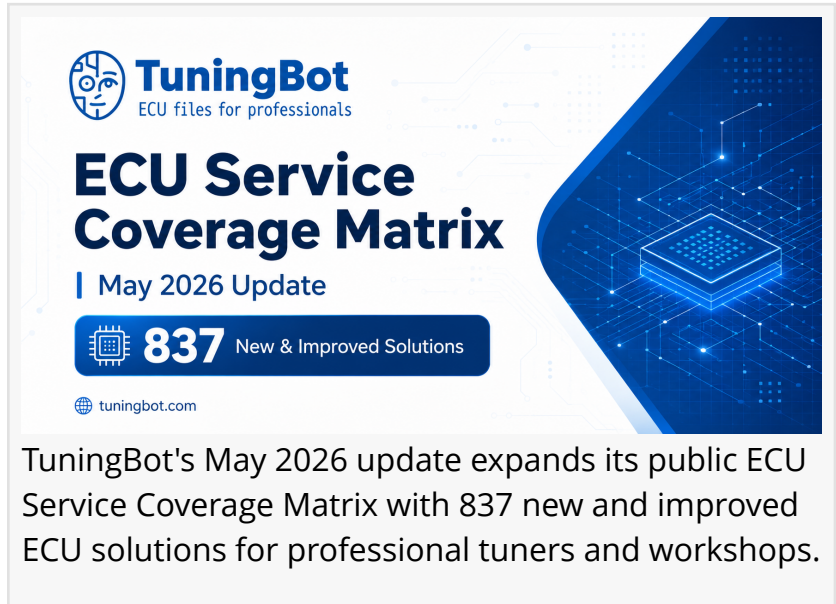

“

Professional workshops need clarity before submitting an ECU file. This update connects public coverage information, structured file submission and support-ticket handling in one workflow.”

workflow.”

TuningBot's online workflow combines compatibility checking, ECU file upload, vehicle and ECU

The graphic features the TuningBot logo (a stylized head with gears) and the tagline "ECU files for professionals". The main headline reads "ECU Service Coverage Matrix" followed by "May 2026 Update". A prominent blue button displays "837 New & Improved Solutions" with a microchip icon. The background is a blue digital grid with a glowing cube and circuit lines. The website "tuningbot.com" is listed at the bottom.

TuningBot's May 2026 update expands its public ECU Service Coverage Matrix with 837 new and improved ECU solutions for professional tuners and workshops.

The purpose of the update is to make pre-order verification clearer for professional users. The public ECU Service Coverage Matrix lets workshops and tuning specialists check which ECU services have already been documented for a specific ECU family or software variant before submitting a file.

"Professional workshops need clarity before submitting an ECU file," said Stefan, TuningBot spokesperson. "This update connects public coverage information, structured file submission and support-ticket handling in one

information, per-file ordering and support-ticket handling. Customers can upload the ECU file, provide the required technical information and receive the processed file through the official TuningBot support workflow.

TuningBot states that all ECU services must be used in accordance with local laws and regulations. Some services may be intended only for off-road, motorsport, export, repair or other legally permitted professional use.

The ECU Service Coverage Matrix is available at:
