

SoftFlow Canada Recognized by ThreeBestRated® for Excellence in IT Services, Cybersecurity, and Network Infrastructure

MONTREAL, QUEBEC, CANADA, May 28, 2026 /EINPresswire.com/ -- For many businesses today, technology problems are no longer minor inconveniences. A network outage, cyberattack, or unreliable IT infrastructure can disrupt operations, impact customer trust, and lead to significant financial losses. As organizations depend more heavily on connected systems, cloud platforms, and secure access to business data, choosing the right IT partner has become a critical operational decision. This is where [SoftFlow Canada](#) steps in.

Since 1987, SoftFlow Canada has delivered professional IT services that help organizations improve performance, strengthen protection, and maintain business continuity. From managed IT services and Microsoft 365 to cloud solutions, structured cabling, and network infrastructure, the company has spent more than 38 years helping businesses navigate an increasingly complex technology environment.

Nearly Four Decades of IT Excellence

What began as a small business in Montréal has grown into a full-service IT company supporting organizations across Canada and internationally. Over the years, SoftFlow has continuously evolved alongside changing technologies, adapting from early network deployments to today's advanced cybersecurity systems and cloud infrastructures.

Today, the company is backed by a dedicated team of more than 25 certified technicians, network specialists, and cybersecurity professionals, providing around-the-clock support to help clients keep their systems secure, stable, and operational. Despite their continued success over the years, SoftFlow Canada believes that their success is not simply because of the services they offer, but also because of the way they approach client relationships.

SoftFlow Canada

SoftFlow Team

We don't position ourselves as a typical IT provider. We act as a true extension of our clients' businesses, taking full ownership of their systems, security, and day-to-day operations. "

David Nelson

"We don't position ourselves as a typical IT provider. We act as a true extension of our clients' businesses, taking full ownership of their systems, security, and day-to-day operations," said David Nelson, Account Director at SoftFlow Canada.

Their objective remains straightforward: delivering practical, scalable, and business-focused IT solutions that clients can depend on every day.

Delivering Complete End-to-End IT Solutions

SoftFlow Canada specializes in comprehensive IT services tailored to businesses of all sizes. Their expertise includes managed IT services, 24/7 IT support, network cabling and infrastructure, Microsoft 365 environments, secure remote access, cloud services, and advanced cybersecurity solutions.

The team distinguishes themselves through their ability to manage an organization's entire IT ecosystem rather than simply responding to isolated technical issues. They design, implement, secure, and optimize complete environments to ensure systems function together efficiently and reliably.

Over the years, SoftFlow Canada has successfully completed complex network cabling and infrastructure projects across industries such as the hospitality sector, financial institutions, corporate offices, and enterprise environments, where uptime, precision, and performance are critical.

Cybersecurity at the Core

As cyber threats become increasingly sophisticated, protection has become one of SoftFlow Canada's primary areas of focus. The team helps businesses safeguard sensitive data, reduce exposure, and maintain continuity through proactive monitoring, prevention, and response.

As a Sophos partner, SoftFlow Canada deploys advanced protection platforms such as Sophos MDR Complete, which provides 24/7 monitoring and response through Sophos's global network of more than 5,000 security experts. Combined with real-time threat detection and active incident response, these solutions help businesses identify and neutralize risks before they escalate into major disruptions.

SoftFlow Canada also helps clients strengthen their overall security posture through prevention, continuous oversight, and rapid response planning.

A Year of Continued Growth and Industry Recognition

In 2025, SoftFlow Canada experienced significant growth, expanding its client base while completing multiple large-scale infrastructure and network cabling projects. The team also strengthened its cybersecurity capabilities to meet the increasing demands of organizations requiring high levels of reliability, security, and operational continuity.

The SoftFlow Canada team's dedication to service excellence and performance earned them recognition from [ThreeBestRated®](#) once again, an achievement the team considers an important milestone. "Being recognized by ThreeBestRated® is something we are very proud of. Their platform has enhanced our visibility and credibility, helping new clients better understand the level of professionalism and expertise we bring," said David.

Looking Ahead to 2026

As SoftFlow Canada continues to grow, the team remains focused on maintaining the same quality, precision, and attention to detail that have defined their work for nearly four decades.

Looking ahead, the company plans to continue investing in Sophos MDR services, cloud technologies, Microsoft 365, and advanced IT infrastructure to support evolving business needs and strengthen client resilience.

David added, "For us, success is measured not only by growth, but also by the strength of the long-term relationships we build and the confidence our clients have in their technology every single day."
