

# Kveeky Cuts Voiceover Production to Under 60 Seconds for Creators

*AI voiceover and text-to-speech platform serves YouTube Shorts, TikTok, and faceless channel creators with 500+ voices across 200+ languages*

SAN FRANCISCO, CA, UNITED STATES, May 29, 2026 /EINPresswire.com/ -- Kveeky, an [AI-powered scriptwriting and voiceover platform](#), today highlighted its role in the accelerating short-form video creator economy, where producers of YouTube Shorts, TikTok videos, Instagram Reels, and faceless YouTube channels are scaling content output at a pace traditional voiceover production cannot match.

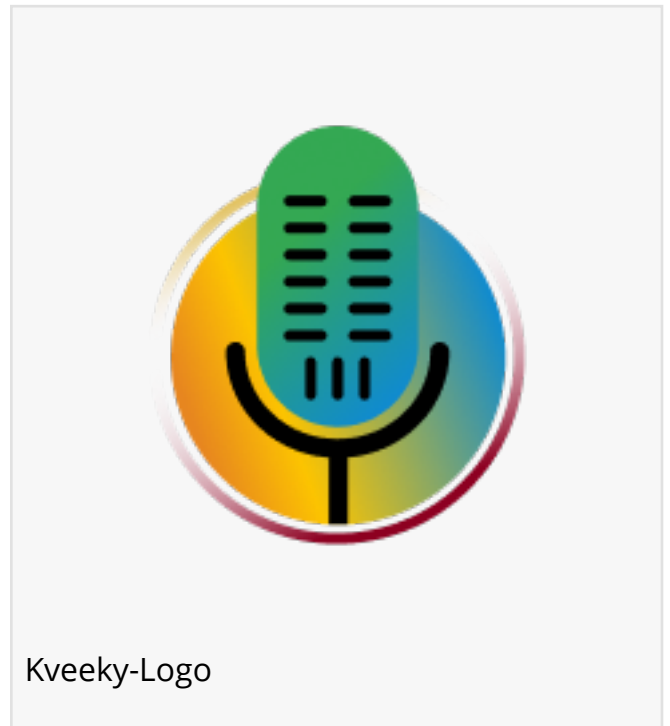

Kveeky's [AI voiceover generator](#) converts text to speech in under 60 seconds, with access to more than 500 natural-sounding AI voices spanning over 200 languages and accents. The platform is designed for creators who publish daily and need professional narration without studio time, voice actor fees, or post-production delays. By combining AI script generation with AI text-to-speech in a single workflow, Kveeky lets creators move from idea to finished voiceover in a fraction of traditional timelines.

“

The creator economy is moving at a pace that broke the old content production model”

*Andy Agarwal, CMO at Kveeky*

“Daily uploads, multilingual versions, and niche channels run by one person simply do not work if voiceover takes a day and costs a hundred dollars. We collapsed that down to a minute.”

Common use cases for the AI voiceover platform include narration for explainer videos, faceless YouTube channels, TikTok and Instagram Reels, language-learning content, e-learning and training courses, audiobooks, podcast intros, advertising, and product walkthroughs. The platform's [multilingual text-to-speech](#) support allows a single piece of content to be republished across regional markets, a localization strategy increasingly used by solo creators and small teams to multiply audience reach without multiplying production effort.

A recent case study showed Kveeky achieving 363 percent growth in AI search visibility and a 340 percent increase in organic traffic over a campaign cycle, positioning the platform within both the AI tools category and the creator productivity category.

"Speed is the feature creators did not know they could ask for," the spokesperson added. "Quality voiceover used to mean slow and expensive. We made it fast, affordable, and accessible to anyone with a script."

Kveeky's AI voice generator supports team collaboration, instant audio preview, customizable voice settings including tone and pacing, multiple export formats, and commercial usage rights for monetized content. The platform offers a free trial along with paid plans designed for creators, marketers, educators, and agencies producing content at volume.

About Kveeky: Kveeky is an AI-powered scriptwriting and voiceover platform designed for content creators, marketers, educators, and businesses. With more than 500 AI voices in over 200 languages, Kveeky's text-to-speech technology enables users to produce broadcast-quality voiceovers and narration in under 60 seconds. The screenshot displays the Kveeky website interface. At the top, the Kveeky logo is shown next to the brand name. Below the logo, the main heading reads "AI Scriptwriter and Voiceover Artist for Your Next Video". A grid of nine AI voice options is presented, each with a profile picture, name, and status (FREE or PREMIUM). The voices listed are: Alex (FREE, Balanced & Neutral), Ethan (FREE, Deep & Resonant), Olivia (FREE, Warm Storyteller), Sophia (PREMIUM, Wise & Calm), Luna (PREMIUM, Bright & Sparkling), Isabella (PREMIUM, Poetic & Expressive), James (PREMIUM, Smooth Professional), Ava (PREMIUM, Melodic & Soothing), and Maya (PREMIUM, Warm & Friendly). A blue banner below the grid offers a "Get 8 Pro AI tools for \$250/year worth \$1,000 - Save 50%, Limited Time" deal with a "Click Now" button. The main content area features the heading "Create Studio-Quality AI Voiceovers in Seconds" and a sub-headline "100+ realistic AI voices • 5x more affordable • No credit card required". Below this is a preview of the AI voice generation interface, showing a list of "Most popular voices" (Brooke, Cannon, Katie, Adrian, Alvaro, Albert) and a text input field with a sample script: "I am so happy to see you here today. [laughter] I hope your day is going really well and full of great energy. Let us have some fun and make the most of every moment! [laughter] Life is truly wonderful when we share it with others." The interface also shows "200 / 400 Characters" and a language dropdown set to "English". The bottom section, titled "How it works", explains the process in three steps: "Enter Your Voice Topic" (with a "Generate" button), "Choose Your Perfect Voice" (with a voice selection interface), and "Download and Start Using Voice" (with a download icon).
