

Beauty Farm Peptide Academy Expands Global Network and Launches Ambassador Program for Women Leaders

Peptides & Regenerative Medicine: Beauty Farm Peptide Academy launches global

Ambassador Program for women leaders to advance education in aesthetic innovation.

CUTLER BAY, FL, UNITED STATES, May 31, 2026 /EINPresswire.com/ -- eauty Farm Peptide Academy Expands Its International Network and Launches Ambassador Program for Women Leaders Across the Americas and Europe

“

Knowledge is not just power; it is the key to transforming lives and elevating our dignity, when founded on excellence and guided by a higher purpose.”

*Deys Siachoque, Founder of
Beauty Farm Peptide
Academy*

In the world of modern aesthetics, peptides have become the most revolutionary trend for skin regeneration and revitalization. At Beauty Farm Peptide Academy, we lead this scientific frontier with biosignaling protocols that transform lives. As stated in Proverbs 2:6, “For the Lord gives wisdom; from His mouth come knowledge and understanding.” As our enrollment period comes to a close, we are not simply offering education—we are providing a transformative opportunity for individuals

seeking to excel in [regenerative aesthetics](#), orthomolecular medicine, peptide biosignaling, and integrative health.

Founded by Deibys Siachoque, a Colombian entrepreneur based in the United States and founder of the Beauty Farm Group and Beauty Farm Peptide Academy, the institution was created with a clear mission: to expand access to specialized education while creating meaningful professional opportunities for individuals seeking to thrive in an increasingly globalized healthcare and wellness industry.

"Our mission is to educate professionals with scientific knowledge, strong values, and a global vision. We are building an international community where women can lead transformative initiatives in their cities, inspiring others through education and professional excellence," said Deibys Siachoque, Founder and CEO of Beauty Farm Group.

The academy's commitment to academic excellence is reinforced through partnerships and educational support from internationally recognized institutions. Programs include academic support and international certification through Florida Global University, along with educational leadership standards supported by the Center of Education and Leadership (CEL). This academic framework is overseen by Dr. Malvis Siachoque, Scientific Director of Beauty Farm Peptide Academy, whose professional experience contributes to the development of evidence-based educational programs, ensuring academic quality, scientific rigor, and continuous curriculum advancement.

As part of its long-term growth strategy, Beauty Farm Peptide

Academy continues to strengthen its institutional framework and international reach, pursuing pathways that may facilitate future recognition and validation opportunities through mechanisms such as the Hague Apostille, in accordance with applicable laws and regulations.

The academy's mission extends beyond education. Beauty Farm Peptide Academy recognizes the challenges faced by professionals and immigrants seeking to establish successful careers in new countries. For this reason, the institution has developed an educational model that combines advanced training, professional development, leadership cultivation, and international networking opportunities. As Colossians 3:23 teaches, "Whatever you do, work at it with all your heart, as working for the Lord, not for human masters." This principle serves as the foundation for every peptide biosignaling protocol, orthomolecular medicine course, regenerative health program, and advanced therapeutic training offered by the academy.

[International Ambassador Program](#)

As part of this expansion, Beauty Farm Peptide Academy is actively seeking qualified professionals to become Official International Ambassadors in their respective cities and countries. The program is designed for professionals in aesthetics, aesthetic medicine, nursing, cosmetology, wellness, integrative health, professional education, and entrepreneurship who share the academy's vision of advancing education and professional excellence.

"Committed to professionalization and empowerment, Dey Siachoque drives Beauty Farm Peptide Academy to provide cutting-edge training designed to transform the futures of thousands of professionals and immigrants worldwide."

Selected ambassadors will gain access to exclusive benefits, institutional recognition, advanced educational opportunities, and international visibility through the academy's official channels. The program is further strengthened by the contributions of current International Ambassadors, accomplished women who embody the values, mission, and vision of Beauty Farm Peptide Academy while inspiring the next generation of professionals worldwide.

The academy is currently accepting ambassador applications for the United States, Caribbean, Mexico, Central America, the Andean Region, the Southern Cone, Brazil, and Europe.
