

Airport Stand Equipment Market Expected to Expand at a 6.4% CAGR Until 2030: Industry Analysis

Asia-Pacific is expected to grow at a highest growth rate, due to continuous rise in number of airports in developing economies such as China and India.

WILMINGTON, DE, UNITED STATES, June 3, 2026 /EINPresswire.com/ -- As per the report, the global [airport stand equipment industry](#) was accounted for \$3.97 billion in 2020, and is expected to reach \$7.22 billion by 2030, growing at a CAGR of 6.4% from 2021 to 2030.

Increase in the global freight and passenger traffic and modernization of airports have boosted the growth of the global [airport stand equipment market](#). However, long shelf life of airport stand equipment hinders the market growth. On the contrary, surge in focus on non-aviation-related revenue would open new opportunities for the market players in the future.

Covid-19 scenario:

The Covid-19 pandemic forced several governments to closed their international airports and implement strict regulations regarding import-export. This negatively affected the demand for airport stand equipment.

The pandemic disrupted the supply chain and created shortage of raw materials. Moreover, the pandemic led to closure of manufacturing facilities.

By stands the airport stands equipment market is segregated into engine access, landing gear access, wheel, aircraft entry, cabin interior, and others. The aircraft entry segment accounted for the highest revenue in 2020, owing to increase in demand for airport stands equipment that are

used for various applications at the airports.
