

# PtEverywhere Expands Access to AI Scribe Across All Subscription Plans

*AI-powered documentation tools are now included in every PtEverywhere tier at no additional cost.*

CARY, NC, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- PtEverywhere has officially announced that [AI Scribe](#) is now included in every subscription plan, giving physical therapy clinics access to AI-assisted documentation without additional fees or a separate software subscription.

Already in use by physical therapy practices, AI Scribe helps clinicians turn recordings, dictation, and quick notes into structured SOAP documentation directly within the PtEverywhere platform. The update expands access to the feature across all subscription tiers, making integrated AI documentation available to a broader range of clinics.

AI documentation tools are often offered as separate platforms or paid add-ons, requiring clinics to manage another system outside their existing workflow. PtEverywhere's AI Scribe is built directly into its [physical therapy EMR](#) and [practice management software](#), allowing clinicians to use AI-assisted documentation inside the same charting environment they already use.

Because AI Scribe is integrated with PtEverywhere, it can work with patient history and previous documentation in the chart. This helps clinicians create notes that better reflect patient progress over time, rather than relying on a single visit or isolated recording.

AI Scribe supports multiple documentation workflows. Clinicians can record, dictate, or type notes, then use the tool to generate structured SOAP documentation. The feature also allows users to replace or append individual SOAP sections or update the entire note. AI Scribe also

works with Copy Last Note, helping clinics add AI support without forcing providers into a completely new documentation process.

Physical therapists using the feature have reported meaningful improvements in their documentation workflow and day-to-day patient care experience.

One user, Kirstin Berger, PT, DPT, Pelvic Floor Physical Therapist at One Strong Woman Therapy, LLC, shared the following feedback:

"I just wanted to say "thank you" to you and your team for all of the recent updates to PtEverywhere. Short story short: I have always struggled with getting my documentation done. It's hard when you are trying to be a good therapist, keeping hands on with your patients, and showing them all of your undivided attention. The AI Scribe feature has been working beautifully for me, and it is allowing me to be the therapist I want to be. I don't feel like I'm falling far behind anymore. Thank you for all of your hard work. I want to say that I appreciate your support."

The expansion of AI Scribe across all subscription plans reflects PtEverywhere's focus on supporting efficient, customizable workflows for outpatient physical therapy practices with practice management software. By including AI Scribe in every plan, PtEverywhere gives clinics access to integrated AI documentation without requiring a separate subscription or third-party tool.

## About PtEverywhere

PtEverywhere is the leading practice management platform for cash-pay and hybrid physical therapy clinics. Built for modern practices, PtEverywhere combines scheduling, documentation, billing, and patient engagement tools to help clinics operate efficiently, deliver exceptional care, and grow profitably.
