

# 3AM Innovations Integrates BK Technologies Radios into FLORIAN Platform

*Integration Expands Real-Time Personnel Tracking and Situational Awareness for Public Safety Agencies*

BUFFALO, NY, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- 3AM Innovations, a public safety technology company providing real-time tracking, accountability, and situational awareness to first responders, today announced it has partnered with BK Technologies to integrate BK radio location data into FLORIAN, its real-time personnel tracking and situational awareness platform. BK Technologies is a leading U.S.-based provider of advanced mission-critical

communications equipment and solutions for public safety agencies. Agencies using BK radios, including fire, law enforcement, EMS, and wildland firefighting organizations, can now leverage existing radio infrastructure to enhance real-time personnel tracking and operational awareness through FLORIAN.

“

Integrating BK radio location data into FLORIAN provides incident commanders with a complete, real-time picture of personnel locations, enhancing operational effectiveness and responder safety”

*Ryan Litt, CEO and Co-founder  
3AM Innovations*

When your team is spread across thousands of acres, knowing where every person is can't wait. FLORIAN now tracks both analog and digital BK Technologies radios in real time — one map, complete visibility, no gaps.

The integration enables FLORIAN to track both analog and digital BK Technologies radios in real time, providing incident commanders with a unified operational view of personnel locations without requiring additional devices or workflow modifications. The solution is particularly valuable for wildland firefighting and other large-scale operations where personnel are dispersed across remote, connectivity-deprived terrain. By combining smartphone and radio location data within a single platform, FLORIAN delivers comprehensive visibility of personnel across broad geographic areas.

Key benefits include:

- Complete personnel accountability through integrated smartphone and radio tracking.
- Expanded operational visibility across connected repeater networks and large incident areas.
- Seamless deployment utilizing existing BK radio infrastructure and FLORIAN workflows.

Ryan Litt, CEO of 3AM Innovations, stated: “BK Technologies radios are trusted by public safety agencies nationwide. Integrating BK radio location data into FLORIAN provides incident commanders with a complete, real-time picture of personnel locations, enhancing operational effectiveness and responder safety.”

John M. Suzuki, CEO of BK Technologies, commented: “This integration extends the value of BK Technologies’ communications solutions by enabling real-time personnel tracking through FLORIAN. Together, we are providing first responders with enhanced situational awareness, decision-making, and ultimately strengthening first responder safety in the most demanding operating environments.”

The partnership reinforces both companies’ positions in the growing public safety technology market by combining mission-critical communications with advanced situational awareness capabilities. The integration of BK Technologies radios into the

FLORIAN platform aligns with each company’s strategic focus on delivering a more connected, interoperable, and capable public safety ecosystem.

### About 3AM Innovations

3AM Innovations is the developer of FLORIAN, a real-time personnel tracking and situational awareness platform purpose-built for first responders and field teams. Originally built to track firefighters, FLORIAN gives incident commanders a live operational picture of every person on scene, regardless of the radio infrastructure or devices a department runs. 3AM Innovations has been named to the GovTech 100 for seven consecutive years and is an awarded supplier on Sourcewell's Public Safety Software contract, with a top-ranked submission in the Situational Awareness category. FLORIAN is also available through Canoe, Savvik, GSA, and Edgemarket. For more information, visit [www.3aminnovations.com](http://www.3aminnovations.com).

### About BK Technologies

BK Technologies Corporation (NYSE American: BKTl) manufactures high-specification communications equipment of unsurpassed reliability and value for public safety and

government agencies. BK's BKR 9000 handheld multiband radio and next generation BKR9500 in-vehicle multiband radio combines advanced features with rugged durability and interoperability to meet the critical demands of first responders. BK's Solutions business unit, which includes the BK ONE family of offerings, combines land mobile radio (LMR) and LTE/5G to create seamless connectivity among first responders for planned and emergency events. BK Technologies is headquartered in West Melbourne, Florida. For more information, visit [www.bktechnologies.com](http://www.bktechnologies.com).
