

# PreFlight AI™ Launches Founding Pilot Program as AI Governance Pressure Mounts

*The EU AI Act takes effect August 2026.*

*The U.S. still has no federal AI standard.*

*Mid-market organizations can't wait for Washington to catch up.*

LOS ANGELES, CA, UNITED STATES, June 3, 2026 /EINPresswire.com/ -- PreFlight AI™, an AI

“

LLMs are tools that answer questions, “PreFlight AI™ tells you whether your organization is built to govern those tools.

Adoption without readiness is not strategy — it is risk.”

*Kim Nelson-Wright*

readiness and governance diagnostic platform built for mid-market organizations, today announced the launch of its Founding Pilot Program — a limited-enrollment initiative that gives organizations early access to the full PreFlight AI™ platform at founding pricing locked for 24 months.

The program launches as AI governance shifts from future concern to current business priority. As regulatory expectations evolve globally and AI adoption accelerates across sectors, many U.S. organizations are moving

forward without a clear internal standard for readiness, accountability, and operational risk. For mid-market organizations, that environment creates a practical challenge: leaders are being asked to adopt AI faster than many companies can assess whether their structures, processes, and governance capabilities are ready.

## What PreFlight AI™ Does

PreFlight AI™ is a self-executing AI readiness and governance diagnostic platform designed to help organizations answer a foundational question: are they structurally prepared to govern the AI tools they are about to deploy?

The platform assesses organizations across five operational dimensions — Leadership Alignment, Process Infrastructure, Data Readiness, Culture & Change Capacity, and Risk & Resilience. It generates a scored readiness profile, a risk heatmap highlighting material exposure areas, and a 30/60/90-day action roadmap for implementation.

PreFlight AI™ is deployment-agnostic & vendor-independent. It does not sell AI tools; it helps leaders establish a governance baseline before selecting, procuring, or scaling AI solutions.

The platform's core intellectual property, the Structural Leadership Model™, is informed by more than 20 years of operational leadership across healthcare, government, nonprofit & corporate environments.

### The Founding Pilot Program

The Founding Pilot Program is designed for organizations that want to build an AI governance foundation before regulation, incidents, or vendor decisions force reactive action. Founding Pilot participation is limited.

Each accepted organization receives:

- A full AI readiness diagnostic across all five dimensions
- Early access to the Governance Readiness dimension, planned for Q3 2026 and mapped to NIST AI RMF, ISO/IEC 42001, and the EU AI Act
- A personalized readiness score and risk heatmap
- A 30/60/90-day implementation roadmap
- Early access to new platform features
- Founding pricing locked for 24 months

FREE [PreFlight AI™ Readiness Scorecard](#) - A free 3-minute, 6-question assessment that gives you a readiness score out of 10 and a brief snapshot of your organization's AI governance strengths and risks.

### Who This Program Is For

The Founding Pilot Program is built for the leaders who will be accountable for AI outcomes. Ideal participants include:

- Operations executives and COOs at organizations with 50-500 employees
- CHROs and people leaders navigating AI adoption and workforce impact
- Fractional executives and consultants building AI-readiness/governance services for clients
- Healthcare and other regulated-industry administrators preparing for emerging governance expectations
- Nonprofit and mission-driven organizations deploying AI while protecting trust, equity, and operational integrity

PreFlight AI™ logo – AI readiness and governance diagnostic platform.

“The organizations that will struggle are not the ones that took time to build structure,” Nelson-Wright added. “They are the ones that moved fast without a governance spine. Clarity Before Automation™ is what responsible deployment looks like.”

[Apply for Founding Pilot](#) - A non-binding Letter of Intent is required to reserve a Founding Pilot spot.

## Regulatory Context

The EU AI Act entered into force in August 2024 and becomes broadly applicable from 2 August 2026. PreFlight AI™'s Governance Readiness dimension aligns with NIST AI RMF, ISO/IEC 42001, the EU AI Act, and OECD AI Principles, giving organizations a practical baseline across multiple frameworks.

## About PreFlight AI™

PreFlight AI™ is an AI readiness and governance diagnostic platform for mid-market organizations. Built on Anthropic's API, the platform assesses organizational readiness using the proprietary Structural Leadership Model™ and produces scored diagnostics, risk heatmaps, and implementation roadmaps.

The platform has completed end-to-end beta testing, converted its first paying clients, and has an active pipeline of 25 organizations. PreFlight AI™ is currently raising a pre-seed round. Investor inquiries are welcome.
