

A Groundbreaking New Musical Illuminates the Genius and Humanity of Albert Einstein

"E=MC²" Releases New Studio Demos Ahead of Highly Anticipated World Premiere in Glendale, California

HOLLYWOOD, CA, UNITED STATES, June 4, 2026 /EINPresswire.com/ -- Following growing interest generated by earlier announcements, the creative team behind *E=MC²* has unveiled three newly released studio demos from the production as anticipation builds toward the show's July 2026 world premiere at the Kiki & David Gindler Performing Arts Center in Glendale, California.

Produced by Wise Woman Musical Theatre Group, *E=MC²* brings to the stage the extraordinary life, struggles, triumphs, and humanity of Albert Einstein through a highly creative original musical blending history, science, politics, romance, and social justice themes.

E=MC² The Musical

The production stars acclaimed vocalist/actor Randy Crenshaw as the elder Einstein/Narrator, alongside actor/maestro Christopher M. Allport portraying the younger Albert Einstein, through pivotal moments spanning 1896 to 1955.

“

I often think in music. I live my daydreams in music. I see my life in terms of music.”

Albert Einstein

The newly released studio demos offer audiences a thought-provoking glimpse into the musical, emotional and thematic scope of Einstein's life.

In one newly released studio demo, [“If I Only Knew”](#), Einstein struggles with the fact that his mathematic formulas were used in the creation of the atomic bomb. So much destruction

happened because of the ideas that came from inside his head. As a militant pacifist, this decision haunted him the rest of his life.

A second newly released excerpt is "[Never Stop Asking Why](#)", where Einstein reflects on the relentless nature of his curiosity. He examines his drive to question fundamental concepts such as gravity, light, and time. Einstein expresses a lifelong commitment to using intuition, imagination and mathematics as tools to demystify the universe — asserting that the answers to these great mysteries lie within his own persistent inquiry.

The third excerpt is the [title song E=MC²](#), where after years of pondering, Einstein finally concludes that energy and mass are one and the same. As a German-Jewish physicist his work was not initially taken seriously. However, in time, his theories were proven correct and accepted by the worldwide scientific community.

The songs, written by Soroca and Allocca, demonstrate the production's stylistic range - blending Broadway tradition with cinematic arrangements, contemporary influence, and emotionally driven storytelling.

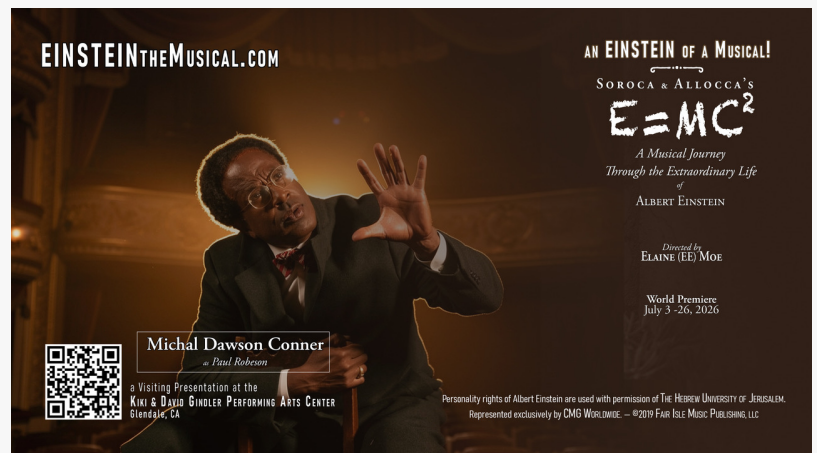

E=MC² explores Einstein not merely as a scientific icon, but as a son, husband, father, immigrant, humanitarian, civil rights advocate, and often witty public figure — navigating one of history's most turbulent eras. These themes are highly relevant today, including antisemitism, political extremism, racism, displacement, and the moral responsibility of science.

The Actors Equity-sanctioned run will take place at the Kiki & David Gindler Performing Arts Center in Glendale, California, with performances starting on July 3, and continuing through closing on July 26, 2026.

Performances are scheduled Thursdays, Fridays, Saturdays at 7:00 PM, and Sunday matinees at 3:00 PM. Performance Dates Include:

E=MC² Musical - Older & Younger Einstein

E=MC² Musical - Paul Robeson

- July 3 (Opening Night – SOLD OUT!)
