

ADA Access Consultants Unveils New ADA Compliant Website Services for Businesses Nationwide

ADA Access Consultants expands its services to include both physical ADA inspections and digital website accessibility solutions for businesses nationwide.

REDONDO BEACH, CA, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- ADA Access Consultants has expanded its service offerings to include digital website accessibility evaluations alongside its existing physical ADA inspection and compliance consulting services.

The expansion reflects a growing compliance trend in which accessibility requirements are applied not only to physical properties but also to digital platforms used by businesses and public-facing organizations. Regulatory standards under the Americans with Disabilities Act (ADA), as well as Web Content Accessibility Guidelines (WCAG), continue to influence how organizations assess accessibility across both environments.

“

Accessibility isn't just about physical buildings anymore. It's changed with the times to include digital spaces too. If you want to stay in business, you need to evolve with the times.”

Ernie Castro CASp #618

The company, which provides Certified Access Specialist (CASp) inspections and ADA plan review services, now includes [ADA compliant website services](#) as part of its broader accessibility assessment framework. These digital evaluations focus on identifying accessibility barriers in website structure, navigation, and user interaction compatibility with assistive technologies.

Physical ADA inspections remain part of the company's core services and typically involve assessments of building access points, parking compliance, interior pathways, restrooms, and

service areas. Findings are documented in formal reports aligned with ADA and California Building Code requirements.

According to the company, the combined approach is intended to address accessibility considerations that span both physical infrastructure and digital user environments, which are increasingly evaluated together in compliance planning.

Industries commonly impacted by accessibility requirements include retail, healthcare, education, real estate, hospitality, and government-related services, where both physical access and website usability may be subject to compliance review.

ADA Access Consultants operates nationwide and provides inspection and consulting services through Certified Access Specialists. Additional information about services and compliance evaluations is available at <https://adaaccessconsultants.com/>, where businesses can review offerings or request consultations. Organizations may also [contact ADA Access Consultants](#) to schedule inspections or discuss compliance-related assessments.

A sample "ACCESS INSPECTED" certificate from the State of California. The certificate is blue with white text. It features a large white checkmark icon in the top left corner. The text reads: "All or part of this facility located at [redacted] has been inspected by a Certified Access Specialist (CAsp)." A large red "Sample" stamp is diagonally across the center. Below the main title, it states: "THIS CERTIFICATE DOES NOT IMPLY THAT THIS FACILITY MEETS DESIGN AND CONSTRUCTION REQUIREMENTS FOR ACCESSIBILITY FOR INDIVIDUALS WITH DISABILITIES." At the bottom, there are fields for "Inspection Date:", "CAsp Certificate #:", "CAsp Signature:", "CAsp Name:", and "Inspection Certificate #:". A circular seal of the State of California is in the bottom left corner. The website "www.dgs.ca.gov/dsa/Programs/progAccess.aspx" is at the bottom right.

The company continues to conduct CAsp inspections in accordance with applicable ADA and California accessibility standards, supporting documentation, and reporting used in compliance planning.

About ADA Access Consultants

ADA Access Consultants provides accessibility inspection and consulting services focused on ADA and California Building Code compliance. The company offers Certified Access Specialist (CAsp) inspections, ADA plan reviews, compliance reporting, and consulting services for commercial and

public properties. Its services also include ADA compliant website services to support digital accessibility assessments alongside physical evaluations.
