

# B2i Digital Welcomes Renforth Resources Inc. as a New Featured Company

*Quebec-Focused Gold and Critical Minerals Explorer With Two Wholly-Owned Deposits Beside Agnico Eagle's Canadian Malartic Mine*

NEW YORK, NY, UNITED STATES, June 4, 2026 /EINPresswire.com/ -- [B2i Digital, Inc.](#) today announced that [Renforth Resources Inc.](#) (CSE: RFR) (OTC: RFHRF) (FSE: 9RR) has been named a [B2i Digital Featured Company](#). Renforth is a Canadian mineral exploration company focused on gold and critical minerals

assets in Quebec's Abitibi region, one of the most active mining regions in North America.

Renforth owns two deposits outright near Malartic, Quebec: Parbec, a gold deposit on the Cadillac Break, and Victoria, a nickel sulphide polymetallic deposit. Both sit in a long-running mining district next to Agnico Eagle's Canadian Malartic mine, the largest gold mine in Canada, with road access, hydroelectric power, proximity to existing mining infrastructure, and an experienced local workforce already in place, the kind of setup that usually takes explorers years and significant capital to assemble.

“

A company like Renforth is exactly the kind we want to be putting in front of investors.”

*David Shapiro, Chief Executive Officer, B2i Digital*

Parbec holds 362,800 ounces of gold, including 265,800 ounces in the measured and indicated categories. The

resource was priced at US\$2,100 an ounce, well below where gold trades today, and the property still has its original 1980s underground decline, a head start on the bulk sample now moving through permitting.

Victoria carries an initial inferred resource of 125 million tonnes, roughly 413 million pounds of nickel-equivalent across nickel, cobalt, copper, zinc, and silver, with platinum and palladium since confirmed in follow-up assaying. North America produces very little of either metal. That estimate covers only about 2.5 kilometres of a roughly 20-kilometre mineralized trend, so most

Parbec Gold Deposit and Victoria Polymetallic Deposit Advancing Through a 2026 Field Program

of the system has yet to be tested.

“Mining and critical minerals are a big part of what we do at B2i, and it’s a world we love being in. We spend a lot of our time around the sector, the companies, the conferences, and the investors who follow it. A company like Renforth is exactly the kind we want to be putting in front of them,” said David Shapiro, Chief Executive Officer of B2i Digital. “You’ve got a serious gold deposit with real ounces, not just a drill target, plus a large polymetallic system carrying nickel, cobalt, and platinum-group metals, all of it in one of the best mining addresses in Canada. Precious metals and critical minerals under one roof, and we’re glad to be helping Nicole and her team tell that story to the right people.”

“Joining the B2i Digital Featured Company program comes as we get back to active field work on both deposits,” said Nicole Brewster, President and Chief Executive Officer of Renforth Resources. “We’ve restarted stripping at Parbec, launched an AI-enabled targeting program across our Malartic Metals Package, and received our drill permit for Victoria. Our plan has always been simple: let the gold at Parbec finance the nickel at Victoria. With a lot of news coming this year, the timing to reach more investors is right, and we’re glad to have the B2i Digital team alongside us.”

About B2i Digital, Inc.

B2i Digital, Inc. partners with investor conferences, public companies, and capital-markets advisors through its Featured Conference, Featured Company, and Featured Expert programs. Acting as The Capital Markets Matchmaker<sup>SM</sup>, B2i Digital connects investors and companies through digital marketing, investor conferences, and direct meetings, supported by a proprietary network of more than 1.7 million market participants.
