Demand for Dredging Market is forecasted to reach a value of US $16.3 billion by 2030

The Business Research Company's Dredging Market Report 2026 – Market Size, Trends, And Global Forecast 2026-2035

The Business Research Company

LONDON, GREATER LONDON, UNITED KINGDOM, June 5, 2026 /EINPresswire.com/ -- "The dredging industry has seen consistent growth over recent years, driven by expanding maritime activities and infrastructure development. As global trade and coastal urbanization continue to evolve, the market is positioned for steady advancement. Let's explore the current market size, key growth drivers, regional outlook, and trends shaping the future of dredging.

Market Size Expansion and Forecast in the Dredging Market
The dredging market has steadily increased, with its size projected to rise from $13.21 billion in 2025 to $13.81 billion in 2026, representing a compound annual growth rate (CAGR) of 4.5%. This upward trend during the past years has been largely supported by growing maritime trade, enhanced port development activities, a pressing demand for navigable channels, expansion of coastal infrastructure, and the growth of marine transportation networks. Looking ahead, the market is expected to continue its steady climb, reaching $16.38 billion by 2030 with a CAGR of 4.4%. Factors contributing to this future growth include heightened coastal protection efforts, increasing urban waterfront projects, expanding offshore and energy-related infrastructure, augmented environmental restoration initiatives, and greater investments in waterway management. Emerging trends include a stronger focus on maintaining navigable waterways, growing demand for coastal defense projects, wider adoption of advanced dredging equipment, increased use in urban and port development, and an emphasis on environmentally sensitive dredging operations.

Understanding the Role and Process of Dredging

Dredging involves the excavation of sediment, debris, and other materials from the bottoms of water bodies such as rivers, lakes, and harbors. This process maintains navigable waterways essential for shipping and transportation by removing accumulated deposits. Besides ensuring safe navigation, dredging supports activities like land reclamation, environmental cleanup, and the extraction of underwater resources. It plays a vital role in sustaining marine infrastructure and facilitating trade.

Key Market Drivers Supporting the Growth of the Dredging Industry
The rising volume of sea-borne trade is a significant factor propelling the dredging market forward. Sea-borne trade refers to the movement of goods via accessible maritime routes and ports. As global demand for goods escalates, there is a growing need for efficient, large-scale transportation, which ships provide at a lower cost over long distances. Dredging facilitates this by expanding and maintaining ports and waterways, ensuring that large vessels can navigate safely and efficiently. For instance, in June 2023, the United Nations Conference on Trade and Development reported that maritime trade was forecasted to increase by 2.4% in 2023. Furthermore, it is expected to maintain an annual growth rate above 2% from 2024 to 2028. This consistent growth in waterborne commerce directly drives the demand for dredging services.

Regional Analysis Highlighting Asia-Pacific’s Dominance in the Dredging Market
In terms of regional market share, Asia-Pacific led the dredging market in 2025. The comprehensive market study also examines other key regions, including South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa. This geographic insight helps provide a broad perspective on global market dynamics and regional growth patterns within the dredging sector.

What’s included in our 2026 market reports:

• Market attractiveness scoring and analysis
• Total addressable market (TAM) analysis
• Company scoring matrix graphics and tables
• Excel-based forecasting dashboards
• Market hotspots infographics
• Key technologies and future trend analysis
• Updated graphics and tables
