

Cearvol Wave Earns Double Design Honor, Winning Both the MUSE Design Award and the American Good Design Award

NEW YORK, NY, UNITED STATES, June 5, 2026 /EINPresswire.com/ -- [Cearvol](#), a forward-thinking consumer electronics brand dedicated to delivering premium audio experiences, today announced that its flagship product, the [Cearvol Wave](#), has been honored with two prestigious international design accolades: the MUSE Design Award and the American Good Design Award. These back-to-back wins mark a landmark milestone for the brand and affirm the Cearvol Wave's standing as a benchmark of design excellence in the audio industry.

A Dual Recognition of Design Excellence

The MUSE Design Award, presented by the International Awards Associate (IAA), recognizes outstanding achievement in design across a wide range of disciplines. Recipients are evaluated on creativity, innovation, functionality, and the ability to positively impact the lives of users. The Cearvol Wave's selection as a MUSE honoree places it among the world's most distinguished and forward-looking product designs.

The American Good Design Award is one of the most storied and respected honors in the American design community, celebrating products that demonstrate a harmonious balance of aesthetic vision, practicality, and engineering excellence. Earning this recognition underscores the Cearvol Wave's ability to meet the highest standards of both form and function expected by today's discerning consumers.

Cearvol Wave Design Award

A Product Built Around People

The Cearvol Wave stood out to international juries for its revolutionary approach to hearing aid design.

Moving away from the clinical look of traditional devices, the Wave features an industry-first interactive touchscreen charging case. This allows users to easily manage settings, adjust volume, and monitor battery life without needing to navigate a smartphone app—offering unprecedented convenience for users of all ages.

Coupled with advanced AI-powered noise cancellation and voice enhancement, the Wave delivers crystal-clear sound quality encased in a premium, discreet, and comfortable form factor.

Cearvol Wave Design Award

"Receiving both the MUSE Design Award and the American Good Design Award is a powerful validation of the vision and dedication our entire team has poured into the Cearvol Wave," said Ken Zhu, CEO at Cearvol. "We believe that beautifully designed products should also be genuinely useful and joyful to use every day. These honors inspire us to keep pushing the boundaries of what's possible."

Setting a New Standard

With these two wins, Cearvol Wave joins an elite group of internationally recognized products that have demonstrated the rare ability to resonate with both design juries and everyday consumers alike. The dual recognition reflects growing global awareness of the Cearvol brand and its commitment to raising the bar for audio product design.

About Cearvol

Cearvol is an innovation-driven hearing technology company dedicated to making high-performance hearing solutions more intuitive, accessible, and lifestyle-friendly. By integrating advanced signal processing, ergonomic design, and wearable intelligence, Cearvol creates new hearing experiences for users with mild to moderate hearing loss.

"Stylish Hearing, Vibrant Living" is Cearvol's brand philosophy—empowering people to hear confidently, communicate effortlessly, and engage fully in the moments that matter. For more information, please visit www.cearvol.com.
