

Restoration Landscape Named 2026 Best of North Carolina Award Winner

CHARLOTTE, NC, UNITED STATES, June 9, 2026 /EINPresswire.com/ -- Restoration Landscape, a North Carolina-based landscaping company serving Charlotte and surrounding communities, has been named a 2026 Best of North Carolina Award winner, recognizing its consistent approach to turning underperforming outdoor spaces into well-designed, functional environments. The honor highlights a company that has quietly built its reputation by addressing a common homeowner frustration: putting in the time to maintain a yard without seeing results that last.

Rather than relying on quick fixes or one-size-fits-all maintenance plans, Restoration Landscape begins each project by understanding how clients want to use their outdoor space, then building a tailored plan that connects design, installation, and ongoing care. The company offers a full range of services for both residential and commercial properties, including landscape design, turf care programs, lighting, and specialized work such as mini excavator services. Behind the scenes, a structured process sets them apart. A dedicated client portal, consistent communication, and attention to detail help ensure projects stay organized and aligned from start to finish. Their use of environmentally conscious materials and native plant design also reflects a long-term approach focused on sustainability as well as appearance.

“Revive, Renew, Restore. Your Trusted Landscape Partners’ is more than a phrase for us,” said a member of the Restoration Landscape team. “It’s how we approach every project, making sure clients feel confident not just in how their space looks, but in how it functions over time.”

The 2026 Best of North Carolina Award underscores the company’s steady growth and commitment to delivering reliable results in an industry where consistency can be difficult to find. As Restoration Landscape looks ahead, the team remains focused on refining its process, expanding its reach, and continuing to create outdoor spaces that hold up long after the work is done.
