

Sentinel Blue Surpasses 50 CMMC Level 2 Certifications Across Shield and Radar Programs

Sentinel Blue has helped 57 organizations achieve CMMC Level 2 certification via its Shield managed cybersecurity program and Radar C3PAO assessment practice.

CULPEPPER, VA, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- Sentinel Blue today announced that it has helped 57 organizations achieve CMMC Level 2 [certification](#) through its [Shield](#) managed cybersecurity program and its [Radar](#) C3PAO assessment practice, marking a significant milestone as cybersecurity requirements become increasingly crucial across the Defense Industrial Base.

SENTINELBLUE

Sentinel Blue, a Virginia-based cybersecurity and IT services firm supporting the Defense Industrial Base and other regulated industries.

"As we see it, it's another day and another milestone!" said Andy Sauer, CEO of Sentinel Blue.

“

That focus on operational excellence has helped differentiate our team and position other organizations in the CMMC ecosystem to better protect sensitive information and support mission readiness.”

Sam Marksberry

“Sentinel Blue remains one of the leading partner organizations in the CMMC ecosystem, and among the few who are having an impact on both the implementation and certification side of the house. That has given us a unique perspective on the DIB and the challenges of achieving CMMC certification. We’re proud of the part we’re playing in the story here, and I’m personally incredibly proud of our team for the tremendous hard and thoughtful work they put in every day to keep these milestones coming. Truly, this team is second to none.”

As both a managed cybersecurity provider and accredited

CMMC Third Party Assessment Organization (C3PAO), Sentinel Blue has worked alongside organizations at every stage of the certification process, from early readiness efforts through formal assessment and certification.

Across readiness efforts, managed security engagements, and formal assessments, one lesson

has emerged consistently: organizations that treat cybersecurity as an ongoing operational responsibility are more successful than those focused solely on passing an assessment.

“Sentinel Blue has spent years building one of the most active CMMC communities in the industry, and seeing over 50 organizations achieve certification through our programs is incredibly rewarding,” said Sam Marksberry, VP of Operations at Sentinel Blue. “As organizations continue adapting to evolving CMMC requirements, we’re excited to keep investing in the community and helping companies successfully meet the challenges ahead.”

The milestone builds on Sentinel Blue’s continued work supporting contractors and regulated organizations as cybersecurity expectations increase across government and industry. Since launching its accredited assessment practice and expanding its managed cybersecurity offerings, Sentinel Blue has positioned itself at the center of CMMC compliance in response to a pressing industry need.

“Certification alone has never been the goal for us,” Marksberry said. “The real challenge is building operationally mature cybersecurity programs that can withstand real-world scrutiny over time. We’ve invested heavily in building high-quality operational, security, and compliance capabilities. That focus on operational excellence has helped differentiate our team and position other organizations in the CMMC ecosystem to better protect sensitive information and support mission readiness. We believe that’s a positive shift, and we’re proud to have helped 57 organizations reach this milestone.”

About Sentinel Blue

Sentinel Blue is a CMMC leader and managed security service provider bringing the power of enterprise cybersecurity tools to federal contractors of all sizes. Specializing in emerging technologies and digital transformation, Sentinel Blue offers comprehensive, scalable, end-to-end cybersecurity solutions for clients and partners within the Defense Industrial Base and other highly regulated industries. Guided by a belief that enduring security is built through thoughtful leadership, creative problem solving, and a commitment to doing the work the right way, Sentinel Blue partners with contractors and enterprises to protect sensitive information, meet regulatory requirements, and support national security missions.
