

CableFree Wins Prestigious Small Cell Forum Award at Small Cell World Summit 2026

Award Category: Outstanding hardware and components products or technology

OXFORD, OXFORDSHIRE, UNITED KINGDOM, June 8, 2026

/EINPresswire.com/ -- [CableFree](#): Wireless Excellence, a leading provider of advanced wireless communication solutions, today announced that it has been awarded “Outstanding Hardware and Components Products or Technology” at the [Small Cell](#) Forum (SCF) Mobile Network Awards 2026, held during the Small Cell World Summit in London.

The award recognises CableFree’s Integrated Smart Small Cell Platform, a scalable, flexible, and future-proof solution designed to support next-generation wireless networks, including private [5G](#), neutral host deployments, and high-capacity urban and industrial connectivity.

The Small Cell Forum judges praised the solution, stating: “The CableFree entry is a great example of how excellence in hardware integration at all levels can result in a platform that can perform strongly in a wide variety of scenarios and applications.”

CableFree’s integrated platform combines advanced radio design, edge compute capability, and modular architecture to deliver high performance across diverse deployment environments—from dense urban small cells to mission-critical enterprise and industrial networks. Its design supports rapid deployment, simplified integration, and long-term scalability aligned with evolving 5G and future network requirements.

CableFree wins SCF Award 2026 in London

Stephen Patrick, CEO of CableFree, commented: “We are honoured to receive this recognition from the Small Cell Forum, which reflects the strength of our engineering and our commitment to delivering practical, high-performance solutions for real-world deployments. Our integrated smart small cell platform was designed from the ground up to address the growing complexity of modern wireless networks—combining flexibility, scalability, and reliability in a single architecture. This award is a testament to the dedication of our team and our focus on enabling next-generation connectivity for operators, enterprises, and system integrators worldwide.”

This achievement reinforces CableFree’s position as a trusted innovator in small cell technology and private network infrastructure, supporting customers across telecommunications, transport, utilities, and smart city sectors.

“

The CableFree entry is a great example of how excellence in hardware integration at all levels can result in a platform that can perform strongly in a wide variety of scenarios and applications”

About CableFree: Wireless Excellence

CableFree: Wireless Excellence is a global provider of cutting-edge wireless communication solutions, specialising in small cells, private 5G networks, millimetre wave backhaul, and advanced radio technologies. With a focus on performance, reliability, and innovation, CableFree enables organisations worldwide to deploy scalable and future-ready wireless infrastructure.
