

As Workplace Wellness Moves From Perk to Planning Priority, InMovement Brings the Unsit® Treadmill to NeoCon

InMovement brings active-office solutions to NeoCon, helping designers, procurement teams, and facilities leaders integrate wellness into the workday.

CHICAGO, IL, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- [InMovement](#), maker of

“

Wellness has to be more than a perk. It has to be easy to specify, easy to use, quiet, and strong enough to earn its place in the workplace for years. That is what the Unsit was built to do.”

*Maizie Breuner, co-owner of
InMovement*

premium movement-focused workplace products, will attend NeoCon for the first time this June, bringing its flagship [Unsit® Under Desk Treadmill](#) and complementary workplace products to the commercial interiors, procurement, and workplace wellness communities. At Booth 7-10093 on the 7th floor, InMovement will demonstrate how movement can be thoughtfully integrated into modern work environments without sacrificing focus, comfort, or design.

As organizations continue to rethink the role of the office, InMovement is inviting designers and decision-makers to consider a more human, movement-friendly approach to

the workday. The Unsit Under Desk Treadmill is designed for real work: quiet enough for shared offices and libraries, wide enough for natural movement and full desk access, and durable enough for daily use in commercial and institutional environments.

“Our goal at NeoCon is to show procurement professionals, interior designers, and workplace leaders that wellness can be built into the workday in a way that feels natural, thoughtful, and practical,” said Maizie Breuner, co-owner and managing director of InMovement. “The Unsit is not a fitness product being forced into an office. It is a workplace solution purpose-built for focus, comfort, and long-term use.”

Unsit Treadmills are already used in corporate offices, professional sports organizations, logistics environments, universities, and libraries across the country. In higher education, many installations are located in library settings, underscoring one of the product’s defining strengths: ultra-quiet operation in places where concentration matters.

The Unsit operates at just 42.9 dB, helping employees, students, and guests walk while they work without disrupting those around them. Unlike standard walking pads or fitness treadmills, the Unsit's extra-wide 30-by-40-inch walking surface gives users room to move naturally, shift comfortably, and access the full width of a desk while working. Its compact footprint is engineered for the spaces where people actually work, from private offices and shared workstations to libraries, wellness rooms, and collaborative environments.

Durability is also central to the product's value for contract and institutional buyers. The Unsit is built with commercial-grade components and backed by a lifetime frame warranty in the U.S. and Canada.

Throughout its history in the market, InMovement has received no frame replacement requests under that warranty.

"For commercial interiors, wellness has to be more than a perk," Breuner added. "It has to be easy to specify, easy to use, quiet enough for the environment, and strong enough to earn its place in the workplace for years. That is what the Unsit was built to do."

At [NeoCon 2026](#), InMovement will share product information, installation examples, and commercial project resources for teams exploring active-office solutions across corporate offices, higher education, libraries, coworking spaces, and other shared environments. Attendees can visit InMovement at Booth 7-10093 on the 7th floor to experience the Unsit in person.

Key Product Highlights

- Ultra-quiet operation: 42.9 dB performance supports focused work in offices, libraries, and shared spaces.
- Extra-wide walking surface: A 30-by-40-inch deck gives users comfort, stability, and easy access to the full desk.

InMovement's Unsit® Under Desk Treadmill brings quiet, comfortable movement into modern workplaces, helping employees stay active while they work. Image courtesy of InMovement.

- Built to last: Commercial-grade construction and a lifetime frame warranty support long-term workplace use.
