

An Architectural Mirage in the Hills: Inside Magnolia Outdoors' Newly Completed Brentwood Waterscape

A minimalist, infinity-edge retreat engineered to mirror the modern lines of a prominent Hollywood estate.

SHERMAN OAKS, CA, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- Expert in luscious high-end exterior architecture, [Magnolia Outdoors](#) is proud to release a new project of a luxury and very special pool and environment for a celebrated Hollywood icon in the elite community of Brentwood, California. Based out of Sherman Oaks, the company was known for its expertise and engineering-first philosophy, making an ambitious architectural vision into a [glorious year-round backyard paradise](#).

This groundbreaking initiative is a testament to the company's commitment to delivering bespoke construction solutions and showcasing the transformative power of intricate design and exceptional execution under a single contract.

The Client's Vision: An Island-Inspired Oasis

The client came to Magnolia Outdoors with a clear and highly unrealistic vision: a resort-style home in the backyard, alongside a private high-end luxury estate in the expansive, sloped Brentwood home where he lived. The objective was to create a seamless indoor/outdoor transition, perfect for the modern style architecture of the home, with clean, geometric lines, a built-in hydrotherapy spa, and a series of custom social spaces for private relaxation and world-class entertainment.

"A project of this caliber demands that water be treated as a core architectural element rather than an afterthought," states a Magnolia Outdoors spokesperson. "Our client wanted a sanctuary that felt organically tied to the landscape. We designed the entire environment to act as a natural extension of the primary living space, matching the exact caliber, sophistication, and luxury of the home's interior."

The Advanced Design and Planning Phase

The Magnolia Outdoors design team used its patented 3D spatial modeling technology to realize this complex vision. The advanced visualization process enables the client to 'walk through' the

proposed waterscape before the first shovel turns over any dirt. Each detail of every architectural element, from the emplacement of the submerged lounging platforms to the acoustic placement of the water features, was carefully conceived and tested to guarantee unparalleled ergonomics and exposure to the sun of Southern California.

Navigating Complex Brentwood Permits and Compliance

The development of luxury pools adds significant technical and regulatory challenges on top of the development of a premium property in the foothills of the Santa Monica Mountains. The site was constrained by tight hillside site restrictions, complex soil stability requirements, and a critical seismic structural engineering challenge. Magnolia Outdoors handled the entire municipal permit process, so there were no delays to the client's tight timeline, as the local Los Angeles building authorities were involved.

Precision Construction and Engineering

With permits obtained, the construction and structural staff of Magnolia Outdoors moved in and began breaking ground on the project, overseeing every aspect of the build in a cohesive and coordinated manner.

Specialized Structural and Design Features Installed Include:

Bespoke Shotcrete Pool Shell

A precision-engineered, steel-reinforced swimming pool from scratch, perfectly formed to fit into a unique topography.

Vanishing Edges & Flush Deck Overflows

An elite infinity edge pool format that has just carved an infinity edge meeting the views of the canyon with hidden slot drains for a minimal look.

Resort-Scale Social Amenities

Excessive Baja shelf, built-in umbrella anchors, sleek in-water tanning ledges, as well as a custom flush-mounted spillway spa.

Artisanal Finish Plasters & Masonry

Hand-selected iridescent glass mosaic tile lines, premium French gray pebble aggregate plaster, and natural stone coping that produce a render having a deep, reflective appearance like a mirror.

Intelligent Pool Eco-Systems

Next-generation of smart pool automation, variable-speed filtration with energy savings, and eco-friendly UV/Ozone sanitization systems with reduced chemical usage.

Flawless Delivery of a Modern Masterpiece

Continuously using in-house excavation, engineering, plumbing, and masonry crews eliminated the typical 'contractor carousel' and resulted in a job done on time and within the construction budget. The building was an architectural triumph when it was presented to the client, and it generated instant and complete long-term residential market value and equity on the property.

About Magnolia Outdoors

Magnolia Outdoors of Sherman Oaks, California, is the [top outdoor construction company](#) that provides luxury custom pool designs, state-of-the-art structural engineering, and lifestyle estates. Opening her doors to the highest caliber craftsmanship, knowledge of local building codes, and an open book on the price, the company caters to homeowners who look for the best of the best in Los Angeles, Ventura, and Orange County. Magnolia Outdoors is committed to enhancing the lifestyle in Southern California through beautiful, durable, lifetime outdoor architecture.
