

Foxwell to Showcase Advanced Diagnostic Solutions at Automechanika Astana 2026

Foxwell will showcase NT680 Plus, i50TS, i70II and i80II diagnostic solutions at Booth P07D during Automechanika Astana 2026 in Kazakhstan.

MARIETTA, GA, UNITED STATES, June 8, 2026 /

EINPresswire.com/ -- Foxwell, a professional provider of automotive diagnostic and service solutions, is pleased to announce its participation in Automechanika Astana 2026.

The exhibition will take place from June 10–12, 2026, at the Astana International Exhibition Centre (EXPO) in Astana, Kazakhstan. Visitors are invited to meet the Foxwell team at Booth P07D to explore the company's latest diagnostic technologies designed for repair shops, technicians, fleet operators, and automotive service professionals across Central Asia.

As one of the leading aftermarket exhibitions in Central Asia and the Caspian region, Automechanika Astana gathers automotive manufacturers, distributors, service providers and industry experts from around the globe. It serves as a vital platform for enterprises looking to expand business opportunities in Kazakhstan and neighboring markets.

As part of its regional expansion strategy, Foxwell will leverage this event to strengthen its presence in Central Asia and forge new partnerships with local distributors, service centers and automotive industry collaborators.

Throughout the three-day exhibition, Foxwell will showcase four flagship solutions engineered for professional vehicle diagnostics and multi-brand repair services:

- [NT680 Plus](#)

An upgraded multi-system [diagnostic scanner](#) built for vehicle health checks, maintenance services and trouble code analysis. Featuring enhanced hardware for smoother operation and WiFi software update capability, NT680 Plus delivers a cost-effective solution to help technicians

quickly identify and resolve vehicle issues.

- i50TS

It combines entry-level full-system diagnosis with dedicated TPMS service functions. Compatible with major American, Asian and European vehicle makes, it supports complete TPMS workflows including system health checks, [T10](#) sensor activation, programming and relearn. It also comes with a full suite of commonly used service functions such as Oil Reset, EPB reset, throttle adaptation, steering angle calibration, and ABS Bleeding. Practical and budget-friendly, it is an ideal choice for professional technicians and automotive enthusiasts.

- i70II

A newly developed professional diagnostic system powered by Android 9.0 OS. Inheriting Foxwell's proven automotive diagnostic technology, it delivers full-system coverage for over 90 vehicle makes and integrates more than 35 special service functions with accurate test data. Boasting outstanding cost performance, it is the perfect workhorse for busy repair workshops.

- i80II

Equipped with Android 9.0 multitasking OS, a 10.1-inch LCD touchscreen and a high-speed quad-core processor. It offers extensive vehicle coverage and OE-level diagnostic capability, along with support for new energy vehicle diagnosis and professional ECU coding. It greatly boosts convenience and efficiency for all diagnostic and maintenance tasks.

Supporting the Growth of Central Asia's Automotive Aftermarket

The automotive sector in Central Asia continues to draw growing investment and attention, driving rising demand for advanced diagnostic tools, TPMS solutions and workshop equipment.

During the show, Foxwell representatives will conduct live product demonstrations, discuss distribution partnerships and explore potential cooperation across Kazakhstan and surrounding regions. Foxwell aim to equip local service providers with user-friendly, professional diagnostic tools to meet the demands of both independent garages and large-scale service facilities.

All visitors, distributors and automotive professionals are warmly invited to visit Booth P07D. Come discover Foxwell's cutting-edge diagnostic technologies and discuss mutually beneficial cooperation opportunities in the Central Asian market.

About Foxwell

Foxwell is a brand focused on the R&D of automotive diagnostic and inspection equipment, dedicated to providing easy-to-use and reliable smart diagnostic tools worldwide. Its product line includes professional OBD2 scanners, battery testers, and high-performance thermal imagers, serving over 100 countries and regions. Foxwell products are widely used in automotive repair, industrial inspection, and household maintenance.
