COVID-19 scenario

In the COVID-19 scenario, smart home gadgets have become even more important since they include a number of functions that encourage hygiene and reduce physical contact. Users may manage different parts of their houses with voice-activated smart home gadgets without having to touch surfaces, which lowers the chance of the virus spreading. Because temperature and humidity levels affect the survival and spread of viruses, smart thermostats assist maintain a clean and healthy atmosphere.

The ability to program smart lighting systems to simulate occupancy increases security and

deters prospective criminals by creating the appearance that someone is home even when homeowners are outside.

In high-touch areas, smart appliances that reduce the need for physical contact and promote hygiene, including voice-activated kitchen appliances and touchless faucets, are essential. Integrating health monitoring devices, such as fitness trackers or smartwatches, may provide useful information about a user's health and wellbeing. This information is often used to monitor vital signs or detect symptoms early. By enabling people to manage their homes remotely and through mobile apps, smart home equipment may be accessed and controlled from a distance, decreasing the need for outside help and limiting the risk of infection.

The Solutions segment to rule the market

By component, the solutions segment held the major share in 2022, garnering nearly two-thirds of the global smart home devices market revenue, owing to the growing integration of artificial intelligence (AI) and machine learning (ML) into smart home solutions. The service segment would also display the fastest CAGR of 22.8% throughout the forecast period, owing to the growing need for comprehensive service packages that come with increasingly integrated smart homes.

The Smart Kitchen segment to dominate by 2032

By type, the lighting control segment accounted for nearly one-third of the global smart home devices market share in 2022 and is expected to rule the market by 2032, owing to offer users the ability to adjust color temperatures, brightness levels, and even create personalized lighting scenes to suit various moods and activities which propels the market growth significantly. The smart kitchen segment would also display the fastest CAGR of 23.5% throughout the forecast period, owing to offer users to control ovens, refrigerators, and other devices through natural language commands.

Asia-Pacific garnered the major share in 2032

By region, North America garnered the highest share in 2022, holding nearly two-fifths of the global smart home devices market revenue in 2022, and is projected to retain its dominance by 2032, owing to the increase in adoption of smart security systems, providing homeowners with real-time monitoring and alerts through connected devices aiding the growth of the Smart home devices market. The Asia-Pacific region would also portray the fastest CAGR of 26.1% during the forecast period, owing to the fast-paced urban lifestyle in the region, maintaining homes needs to be convenient and efficient, which is expected to fuel the market growth in Asia-Pacific.
