

Dr. Al Graziano, CEO for CYBER RANGES joins the AFCEA Board of Directors

SHEFFIELD, SOUTH YORKSHIRE, UNITED KINGDOM, June 8, 2026 /EINPresswire.com/ -- Global EdTech vendor for MIL / GOV / and CNI sectors [CYBER RANGES](#) announces that its CEO Dr. Al Graziano has been nominated to AFCEA International's Board of Directors. AFCEA released the new Board nominations at TechNet Cyber in Baltimore, MD on June 1st. AFCEA International (Armed Forces Communications and Electronics Association) is a non-profit 138-Chapter organization that connects government, military, and industry professionals with a shared mission to advance communications, IT, and cybersecurity in service of global security.

Al is both the CEO and Co-Founder of CYBER RANGES. Al is a well-recognized cybersecurity expert for the UN International Telecommunication Union (ITU)'s Global Cyberdrill Programme. Al also co-Chairs ECSO's Working Group 5 on Cyber Range Environments, Education & Training, and Technical Exercises. He is also an industry member of the Global Cybersecurity Forum. Al holds a PhD in mobile security.

Over 25+ years Al has become a passionate evangelist for large-scale ability-centric cyber workforce development programmes supported by what Gartner analysts have termed advanced attack emulation-based range platforms.

Dr. Graziano said: "Attack emulation is no longer emerging technology. As Battlespace and Cyberspace increasingly intertwined into multi-domain engagements. People, Process and Technologies and Human-AI interaction require talent building, regular practice, and mission readiness validation through deep-dive experiential exercises.

CYBER RANGES provides Cyber Commands with a scalable, highly automated, highly orchestrated cyber-physical range from the Schoolhouse to Tactical Edge."

Dr. Al continues: "AFCEA is a unique place where government, military, and industry can sit at the same table. Shared needs are discussed together rather than in isolation. Forging genuine public-private partnerships within the global defence community is very important as NATO and Allied Nations accelerate their investment in designing, building, and securing future, interoperable capabilities and dual-use infrastructures. Our experience with State Service for Special Communications and Information Protection in the joint TRYZUB-Trident cyber-bridge programme confirms us that sharing is crucial and effective as we are all stronger together."

More information on the AFCEA Board of Directors is at:
