

# New SaaS Platform FlipProfitPro Launches to Help Real Estate Investors Track, Manage, and Prove Every Deal in Real Time

*All-in-one operating system replaces spreadsheets and disconnected tools, giving flippers full visibility, control, and lender-ready reporting*

LAKE MARY, FL, UNITED STATES, June 8, 2026 /EINPresswire.com/ -- Global Tech Network today announced the launch of [FlipProfitPro](#), a new software platform designed to help professional real estate investors manage their projects with greater visibility, financial control, and accountability.

“

Being able to show your numbers quickly and confidently isn't a nice-to-have anymore, it's expected.”

*Scot Peterson, Co-founder of FlipProfitPro*

Built specifically for active house flippers, FlipProfitPro brings deal analysis, rehab budgeting, project management, and reporting into one centralized system. The platform is designed to replace the fragmented workflows many investors rely on today, where critical information is often spread across spreadsheets, text messages, and multiple disconnected tools.

In a market where profit margins are tightening and timelines are compressed, even small inefficiencies can

significantly impact overall returns. While many existing tools focus on helping investors find deals, FlipProfitPro addresses a different challenge: managing and proving those deals from start to finish.

“Most investors don't have a deal problem; they have a visibility problem,” said Scot Peterson, co-founder of FlipProfitPro. “They're working across multiple systems, which makes it difficult to track progress, control costs, and confidently present their numbers when it matters. FlipProfitPro brings everything into one place so they can see every detail, track every dollar, and show their results without scrambling.”

The platform is structured around the full lifecycle of a property investment, allowing users to monitor budgets, timelines, contractor activity, and financial performance in real time. Investors can generate professional reports instantly, making it easier to share accurate, up-to-date information with lenders, partners, and stakeholders.

This focus on real-time reporting and transparency is especially important in today's environment, where credibility and access to capital are closely tied to an investor's ability to clearly demonstrate performance.

FlipProfitPro's dashboard easily shows all aspects of your flip at a glance - from deal analysis to real-time financials.

“Being able to show your numbers quickly and confidently isn’t a nice-to-have anymore, it’s expected,” Peterson added. “We built FlipProfitPro to support that level of accountability without adding complexity to the workflow.”

Recognizing that many investors are hesitant to adopt new systems due to time constraints and perceived switching costs, FlipProfitPro was designed for ease of use and rapid onboarding. New users can begin managing a deal within minutes, allowing them to integrate the platform into their existing process without disrupting active projects.

The platform is now available nationwide. Investors can sign up for a 14-day free trial with no credit card required.
