

Aaniiie Care: The Only AI-Enabled Home Care Platform that Truly Does it All — From Personal Care to Skilled Nursing

Aaniiie Care continues to empower agencies with a complete home care software for personal care and skilled services, eliminating the need for multiple systems.

EAU CLAIRE, WI, UNITED STATES, June 9, 2026 /EINPresswire.com/ -- Aaniiie, provider of the leading all-in-one [home care software](#), reaffirmed what home care agencies already know: when it comes to managing the full complexity of in-home care delivery, no platform does more than Aaniiie Care.

“

At Aaniiie, we've always believed agencies deserve technology that works together — not disconnected systems that create extra work, additional subscriptions, or added fees.”

Scott Zielski, Aaniiie CEO

As more home care providers seek to expand service offerings, improve operational visibility, and reduce administrative complexity, many are discovering the challenges of managing skilled and non-skilled services across multiple software platforms. Aaniiie Care addresses those challenges by providing agencies with one software platform that supports both personal care and skilled services workflows.

“At Aaniiie, we've always believed agencies deserve technology that works together — not disconnected

systems that create extra work, additional subscriptions, or added fees,” said Scott Zielski, CEO at Aaniiie. “At Aaniiie, we built our home care platform to eliminate the trade-offs agencies have been forced to make for too long.”

Everything You Need Is All-in-Aaniiie

A natural extension of Aaniiie’s all-in-one philosophy, Aaniiie Care gives agencies the ability to manage multiple lines of care within one platform while maintaining visibility, efficiency, and control. Agencies can manage advanced scheduling, caregiver coordination, medication documentation, custom forms, billing, reporting, and day-to-day operations without jumping between systems.

Aaniiie Care is the only home care platform that unifies the complete scope of agency operations — including capabilities that others are still working to build:

- Personal Care — complete scheduling, caregiver coordination, EVV, billing, and operational management for non-skilled home care services
- Skilled Services — full clinical documentation and workflow support for skilled nursing and private duty nursing, including care plans, Plan of Care/CMS-485, practitioner orders, visit forms, vital signs, and wound care
- Advanced Scheduling & Caregiver Coordination — intelligent staffing across service lines with real-time visibility
- Caregiver Rewards & Satisfaction — built-in gamification and recognition tools that drive caregiver engagement, reduce turnover, and create a culture of retention — without a separate platform
- Aaniiie Payroll — fully embedded payroll, purpose-built for the caregiver workforce
- Aaniiie Payments — integrated payment processing that eliminates the need for a third-party billing vendor
- Aaniiie Intelligence — AI-powered automation woven throughout that surfaces insights, reduces administrative burden, and helps agencies work smarter
- Real-Time Reporting & Analytics — enterprise-grade visibility across every service line, payer type, and operational function
- And much more.

By supporting multiple service lines within one platform, Aaniiie Care helps agencies create a more connected operational foundation for growth.

"Technology should support growth and optimize workflows," added Zielski. "Whether an organization is providing personal care, private duty nursing, or a combination of services, they need an all-in-one software that provides clarity and consistency across their operations."

As the home care industry continues to evolve — with agencies expanding service lines, adding skilled clinical capabilities, and demanding more from their technology — Aaniiie Care stands alone as the platform built to support it all. Personal care, private duty nursing, skilled services, scheduling, billing, payroll, payments, analytics, and AI-powered automation — everything an agency needs to operate, grow, and deliver exceptional care, in one place.

The All-in-Aaniiie Advantage

For agencies tired of managing multiple vendors, manually reconciling disconnected data, or paying for integrations that should already be included, Aaniiie Care offers something the market hasn't seen before: a single platform designed from the ground up to support the full continuum of in-home care. Aaniiie continues to lead innovation and delivery capabilities that improve outcomes.
