

The J1600 Self-Driving Pallet Jack Makes Its First Public Appearance in Italy

Open House on 24–26 June 2026,
Sassuolo (Modena), Italy.

SASSUOLO, MODENA, ITALY, June 9, 2026 /EINPresswire.com/ -- [The Mobile Robot Company](#), together with its Mediterranean partner [Alca Technologies](#) and event host United Symbol (Sistemi Robotici e Automazioni Industriali), is pleased to announce Open House 2026, a three-day event dedicated to practical warehouse automation and intralogistics innovation.

Taking place from 24–26 June 2026 in Sassuolo (Modena), Italy, the event will provide manufacturers, logistics professionals, warehouse operators and automation specialists with the opportunity to experience live demonstrations of the [J1600](#) Self-Driving Pallet Jack and discover how autonomous mobile robotics can be deployed quickly and effectively.

“

We are incredibly excited to bring the J1600 to Italy for the first time and to offer visitors to the event a chance for a hands on experience with the future of pallet transport.”

Fernando Fandino Oliver

The highlight of the event will be the J1600 MRC, an innovative dual-mode autonomous pallet jack that combines manual operation with autonomous transport. Designed for rapid deployment and operational flexibility, the J1600 helps organizations reduce repetitive transport tasks, improve productivity, and accelerate their automation journey without the complexity often associated with large automation projects.

Visitors attending the Open House will be able to:

- Experience live demonstrations of the J1600 MRC
- Learn how autonomous pallet transport can be implemented quickly
- Explore manufacturing, warehouse and intralogistics applications

Emil Hauch Jensen, CEO of the Mobile Robot Company is demonstrating the J1600 self-driving pallet jack.

- Meet automation specialists from The Mobile Robot Company and Alca Technologies
- Discuss real-world deployment strategies and return-on-investment opportunities

About The Mobile Robot Company
The Mobile Robot Company (MRC) designs and manufactures autonomous mobile robots and intelligent intralogistics solutions. The company focuses on practical, easy-to-deploy automation that delivers measurable operational improvements while remaining simple, flexible, and scalable.
