Known for his appearances on television programs including Dead Famous, Psychic Kids, Ghost Hunters, Ghost Adventures, Spooked Scotland, Haunted Ireland, and Help! My House Is Haunted, on such channels as Travel Channel, Discovery, SciFi, A&E, HBO MAX, Fleming has spent more than two decades investigating reports of ghosts, hauntings, spirit communication, consciousness, and unexplained phenomena on TV around the world.

Those experiences became the inspiration for Boogie Man Blues, a collection of original songs that blends traditional blues influences with supernatural storytelling, folklore, humor, redemption, hope, and the mysteries of life after death.

"Today is incredibly meaningful for me," said Fleming. "What began as songwriting during

chemotherapy treatments to take my mind off the diagnosis and pain eventually became a complete album. These songs reflect my expression of real experiences, personal challenges, and questions about life, death, and what may exist beyond our physical reality. I hope listeners connect with the stories and emotions behind the music."

Written during treatment and recovery from AML leukemia, the album explores themes of perseverance, transformation, grief, healing, faith, spirits, and humanity's enduring fascination with the unknown.

Featured songs include Good Ole' Henry, inspired by a childhood paranormal encounter with a ghost; Talking Through the Ouija Board, a spiritual exploration of spirit communication; Why Do Ghosts Got the Blues?, which imagines the emotional lives of spirits; and Boogie Man Come Out at Night, a supernatural blues tale rooted in fear, folklore and facing the dark.

Boogie Man Blues also showcases a modern approach to music production. All song titles, concepts, and lyrics were written by Christopher Fleming, who directed and produced the project using a combination of traditional songwriting methods, emerging AI-assisted music technologies, professional studio production, and collaborative musicianship.

“

During my AML leukemia battle, music made me feel good, it gave me a purpose beyond the hospital walls. Writing songs took my mind off loss and pain and put hope into something meaningful.”

This hybrid album underwent extensive editing, arrangement, engineering, mixing, and enhancement at Waysound Recording Studio in Fox River Grove, Illinois. Additional contributions include guitar, piano, percussion, backing vocals, and studio production support. The album was mastered by Michael Fossenkemper at TurtleTone Studio in New York City.

"This collective project represents the intersection of storytelling, technology, musicianship, and creativity," Fleming said. "The tools may be modern, but the heart of the album remains timeless: telling stories through a lens and genre that moves people."
