

Larry's Gutters Announces Seamless Gutter Installation in Eustis, FL as Rainy Season Peaks Across Lake County

As Florida's Rainy Season Peaks, Eustis Homeowners Along the Harris Chain of Lakes Get On-Site Fabricated Seamless Gutters Sized for Lake County's Summer Storms

EUSTIS, FL, UNITED STATES, June 22, 2026 /EINPresswire.com/ -- Larry's Gutters, a Central Florida gutter contractor with more than 12 years of experience and over 1,000 homes served, has announced the expansion of its service area to include Eustis, FL.

The announcement coincides with the onset of Florida's summer rainy season, which brings concentrated afternoon storm activity to Lake County's Harris Chain of Lakes communities beginning in June.

The Harris Chain of Lakes creates a distinctive drainage environment for Eustis homeowners. Properties located along Lake Eustis, Lake Dora, and the surrounding chain experience some of the most intense summer afternoon storm events in Central Florida — events that can dump more than two inches of rain per hour during peak thunderstorm activity. The need for properly sized [seamless gutter installation in Eustis, FL](#) is particularly acute on lakefront and low-elevation lots, where failing gutters direct water toward already-saturated foundation perimeters. Over a single rainy season, repeated saturation leads to fascia rot, soffit damage, and foundation erosion.

Eustis carries one of the largest concentrations of mid-century residential construction in Lake County. Homes built in the 1970s and 1980s were typically fitted with 4-inch or 5-inch sectional aluminum gutters not sized for Florida's rainfall loads. These original systems are now 40 to 50 years old, and many show signs of joint separation, corrosion at hangers, and pitch loss that causes standing water. [Seamless gutter installation](#) addresses these failures by replacing sectional systems with on-site fabricated aluminum cut to the exact measurements of each roofline run.

Gutter Installation in Eustis, FL

"Eustis is one of our most active service areas and the Chain of Lakes properties present some of the more demanding drainage conditions we work with. Lakefront lots are lower elevation, the storms hit harder, and a lot of those homes still have the original 5-inch gutters from the 1980s. We cut every gutter on-site so it fits the roofline exactly — there are no joints, no seams, and no spots where water backs up against the fascia."

— said a representative of Larry's Gutters

The company's installation process uses K-Style aluminum fabricated on-site at each property, with each run cut to the exact measurements of the roofline. Six-inch gutters are the standard specification on every project. Valley shields are positioned at roof valley intersections as a standard component of the installation scope.

Eustis neighborhoods are defined by a dense live oak canopy that drops continuous debris loads year-round — including leaves, acorns, and Spanish moss during the summer months. For homeowners seeking to reduce ongoing maintenance requirements, Larry's Gutters also offers seamless gutter installation paired with gutter guard systems designed specifically for the debris profiles common in Lake County. Both Bulldog and Hydro-Flo guard options are available depending on debris type, with micro-mesh profiles available for properties with significant pine needle accumulation.

Larry's Gutters serves Eustis as part of its Lake County service territory, which also includes Leesburg, Tavares, Mount Dora, Lady Lake, Fruitland Park, Umatilla, Grand Island, Clermont, Minneola, and surrounding communities. The company is BBB-accredited, a member of the Rain Gutter Association, and backs every installation with a Lifetime Workmanship Guarantee.

About Larry's Gutters

Larry's Gutters is a Central Florida gutter contractor with over 12 years of experience and more than 1,000 homes served across Lake, Sumter, Marion, and Alachua counties. The company specializes in seamless K-Style aluminum gutter installation, gutter guard systems, and gutter repair services for residential and commercial properties. Larry's Gutters is BBB-accredited, an RGA member, and backs every installation with a Lifetime Workmanship Guarantee. Service locations include Leesburg and Gainesville, FL.
