

Winston POS Announces Strategic Hardware Partnership with Global Manufacturer POSBANK

Winston POS and POSBANK partner to offer fast, durable, and seamlessly integrated restaurant hardware at competitive prices.

ST. PETERSBURG, FL, UNITED STATES, June 10, 2026 /EINPresswire.com/ -- Winston POS, the easy to use, innovative, and agnostic point-of-sale system built by and for the restaurant industry, today announced a certified hardware partnership with POSBANK, a global leader in restaurant hardware solutions.

Winston POS in action

This collaboration guarantees Winston POS users access to highly durable, seamlessly integrated, and aesthetically striking hardware configurations, perfectly optimized to run Winston POS.

“

POSBANK is the perfect addition to our recommended hardware lineup. They offer fast hardware at a price point that makes sense, backed by the kind of stellar customer service that our users deserve.”

Koen Lavrijssen, CEO Winston POS

A Major Win for POS Dealers and Restaurants

At its core, Winston POS is built on the philosophy of freedom and flexibility. Unlike legacy POS providers that lock restaurant owners into proprietary, expensive hardware and payment ecosystems, Winston allows operators to choose the setup that works best for their unique environment.

Adding POSBANK to Winston's certified ecosystem is a massive advantage for both restaurants and the POS dealers who support them. This partnership was forged

around three core pillars:

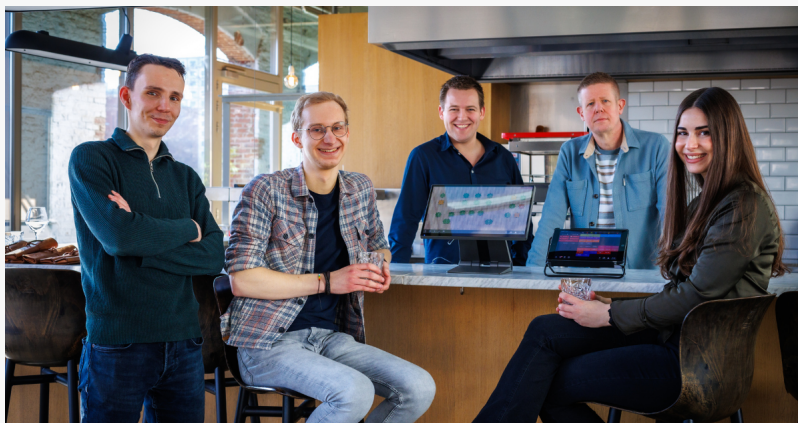

Fast and Reliable Hardware: POSBANK terminals easily exceed Winston's strict processing requirements, ensuring lightning-fast transaction speeds and lag-free order routing even during the busiest lunch rushes.

Highly Competitive Prices: For restaurants and dealers alike, POSBANK delivers enterprise-grade, restaurant-hardened durability at a highly competitive price point, maximizing ROI for restaurant operators and offering great value for resellers.

Great customer service: POSBANK shares Winston's dedication to reliable support. Their responsive customer service and technical support teams ensure that dealers have the backing they need to install systems confidently, and restaurants can keep their operations running smoothly.

Winston POS team

"Our mission has always been to give restaurant entrepreneurs and our trusted network of POS dealers the absolute best tools for the job," said Koen Lavrijssen, CEO of Winston POS.

"POSBANK is the perfect addition to our recommended hardware lineup. They offer incredibly fast hardware at a price point that makes sense, backed by the kind of stellar customer service that our users and partners deserve."

Certified Performance and Seamless Integration

To run Winston POS at optimal speed, the software requires modern processing power, specifically an Intel Celeron J6412 processor or higher. POSBANK's modern terminal lineups easily surpass these thresholds.

With this partnership, Winston now officially offers a tailored selection of POSBANK hardware optimized for the service industry. For front-of-house operations, customers have access to the POSBANK High-End Mazic Prime and POSBANK Edge 1560. These are highly popular, sleek POS terminals built specifically to handle the rigorous demands of restaurant environments.

Furthermore, POSBANK offers exceptional solutions for kitchen operations. After a period of

extensive testing, Winston proudly offers the POSBANK KDS 2700 and KDS 2150 for kitchen displays. These Full HD screens are waterproof, dustproof, and highly durable, making them the perfect solution for fast-paced kitchens and bar stations.

The integrated solutions are already available. To learn more, contact info@winstonpos.com or info@posbank.com. Or visit both companies at RSPA's RetailNOW show, July 26–28, 2026, at Caesars Forum Conference Center in Las Vegas, NV: Winston POS at booth #841 and POSBANK at booth #819.
